**AWARD/CONTRACT**

2. CONTRACT (Proc. Inst. ident.) NO. DTRT57-12-D-30004
3. EFFECTIVE DATE See Block 20C
4. REQUISITION/PURCHASE REQUEST (PROJECT NO.) DTRT-RVT-71-1158
5. ISSUED BY USDOT/FFA/Volpe Center
6. ADMINISTERED BY (If other than Item 5) USDOT/FFA/Volpe Center
7. NAME AND ADDRESS OF CONTRACTOR (No., Street, City, Country, State and Zip Code)
   Lockheed Martin IS&GS
   9221 Corporate Blvd.
   Rockville MD 20850
8. DELIVERY
   [ ] FOR ORIGIN
   [ ] OTHER (See below)
9. DISCOUNT FOR PROMPT PAYMENT Net 30
10. SUBMIT INVOICES (4 copies unless otherwise specified)
    TO THE ADDRESS SHOWN IN
11. SHIP TO/MARK FOR
    See Individual Task Order Awards
12. PAYMENT WILL BE MADE BY
    DOT/FFA Enterprise Services Center
    Volpeinvoices@faa.gov
13. AUTHORITY FOR USING OTHER THAN FULL AND OPEN COMPETITION:
    [ ] 10 U.S.C. 2304 (c) ( )
    [ ] 41 U.S.C. 263 (c) ( )
14. ACCOUNTING AND APPROPRIATION DATA
    51YK859 6257B 25205V $2,500.00
15. ITEM NO 15A. ITEM NO
    15B. SUPPLIES/SERVICES
    Continued
16. TOTAL AMOUNT OF CONTRACT $450,000,000.00

**PART I - THE SCHEDULE**

**PART II - CONTRACT CLAUSES**

17. [X] CONTRACTOR'S NEGOTIATED AGREEMENT (Contractor is required to sign this document and return copies to issuing office.) Contractor agrees to furnish and deliver all items or perform all the services set forth or otherwise identified above and on any continuation sheets for the consideration stated herein. The rights and obligations of the parties to this contract shall be subject to and governed by the following documents: (a) this award/contract, (b) the solicitation, if any, and (c) such provisions, representations, certifications, and specifications, as are attached or incorporated by reference herein. (Attachments are listed herein.)

18. [ ] AWARD (Contractor is required to sign this document.) Your offer on Solicitation Number including the additions or changes made by you which additions or changes are set forth in full above, is hereby accepted as to the items listed above and on any condition sheets. This award consummates the contract which consists of the following documents: (a) the Government's solicitation and your offer, and (b) this award/contract. No further contractual document is necessary.

**PART III - LIST OF DOCUMENTS, EXHIBITS AND OTHER ATTACHMENTS**

19A. NAME AND TITLE OF SIGNER (Type or print)

R.D. Lawrence, Manager of Contracts

19B. NAME OF CONTRACTOR

Lockheed Martin IS&GS
9221 Corporate Blvd.

SECTION B - SUPPLIES OR SERVICES AND PRICES/COSTS

B.1 CONTRACT TYPE (FEB 2011)

A. This is an indefinite delivery/indefinite quantity (IDIQ) task order contract. Work will be placed under this contract through the issuance of task orders.

B. Task orders may be issued on a Firm-Fixed-Price (FFP) basis in accordance with FAR 16.202. Task orders may also be issued on a Cost-Plus-Award-Fee (CPAF), Cost-Plus-Fixed-Fee (CPFF) completion, or CPFF term basis in accordance with FAR 16.305 and 16.306 (d). Task order type shall be determined and issued at the Contracting Officer's discretion consistent with the guidelines provided in Part 16 of the Federal Acquisition Regulations. Performance-based task orders will be used to the maximum extent practicable.

C. The Contract Line Item Number (CLIN) structure provided in Subsection B.4 below establishes a CLIN for the four contract type/pricing methods available for use under this contract. Because using a particular contract type/pricing methodology requires terms and conditions specific to that use, this contract includes terms and conditions covering FFP, CPAF, CPFF completion, and CPFF term tasks. In general, these terms and conditions are clear on their face with regard to applicability.

B.2 CONTRACT LIMITATIONS (FEB 2011)

A. Multiple Contract Awards: Six (6) contracts have been awarded under the Volpe Center Solicitation DTRT57-11-R-20009.

B. Maximum Contract Value: The value of all task orders placed under all contracts awarded shall not exceed Four Hundred Fifty Million ($450,000,000.00). As a task order is issued to one Contractor, its value is subtracted from the total value available to all Contractors.

C. Minimum Guarantee: The guaranteed minimum is $2,500 for each contract.

B.3 CONTRACT SCOPE (FEB 2011)

The Contractor, acting as an independent Contractor and not as an agent of the Government, shall furnish all personnel, supplies, facilities, materials, and management necessary to provide the services required under this contract. The scope of this effort is defined in the Statement of Work (SOW) (see Section C). Specific work requirements will be stated in individual task orders.
ITEM NO. SERVICES
0001 The Contractor shall furnish all personnel, supplies, facilities, materials, and management necessary to provide the services in accordance with the SOW (see Section C) entitled Traffic Management Infrastructure Systems (TMIS) and other terms and conditions of this contract and within one or more of the contract types set forth below:

0001AA FIRM-FIXED-PRICE TYPE*
0001AB COST-PLUS-AWARD-FEE TYPE*
0001AC COST-PLUS-FIXED-FEE (COMPLETION TYPE)*
0001AD COST-PLUS-FIXED-FEE (TERM TYPE)

* Performance-based task orders will be used to the maximum extent practicable.
SECTION C - DESCRIPTION/SPECIFICATION/STATEMENT OF WORK

TRAFFIC MANAGEMENT INFRASTRUCTURE SYSTEMS (TMIS)

C.1 BACKGROUND

The John A. Volpe National Transportation Systems Center (Volpe Center) is a Federal fee-for-service organization within the Research and Innovative Technology Administration (RITA) of the United States Department of Transportation (USDOT). The Volpe Center’s mission is to improve the nation’s transportation systems. In partnership with sponsoring agencies, the Volpe Center provides technical research and analysis services to the USDOT, other Federal agencies, state agencies, and other organizations in connection with the transportation-related components of their missions.

The Volpe Center’s focus is research and innovation in all areas of transportation to improve the transportation system for the future. The Volpe Center is an active partner with several agencies in defining and implementing the future transportation system. For example, the Joint Planning and Development Office (JPDO) has developed an interagency framework in which several executive agencies of the U.S. Government, including the USDOT, are participating in developing the future aviation system. Within the USDOT, the Federal Aviation Administration (FAA) is leading the future aviation system activities. Another agency the Volpe Center is supporting is the Federal Railroad Administration in the area of High Speed Rail (HSR) research and safety.

The Volpe Center is supporting the FAA and other modal agencies in future aviation system plans/developments as well as future plans in other transportation modes. The Volpe Center utilizes a combination of Federal and Contractor personnel to marshal the broad range and quantity of skills needed to support sponsoring agencies’ projects. By establishing a “pool” of professional technical/scientific resources, the Volpe Center can respond to uncertain, long-range requirements of its technical program in a timely and effective manner. The Contractor will constitute an important part of the Volpe Center’s resources and will provide high-technology capabilities and skills targeted to the Volpe Center’s programmatic requirements in the area of Traffic Management Infrastructure Systems (TMIS).

C.2 SCOPE OF WORK

The Volpe Center’s programmatic activities for TMIS fall primarily in the area of transportation infrastructure, the foundation of facilities, equipment, and related services needed for the safe and secure movement of goods and people. The Contractor must possess the primary skills required for TMIS, which are in the engineering and physical science disciplines (see below) as they relate to the specification, design, development, testing and operation of traffic management systems. The primary skill requirements for this contract may include, but are not limited to:

- Systems Engineering and Integration
- Electronic Engineering
- Electrical Engineering
- Aeronautical Engineering
- Mechanical Engineering
- Marine Engineering
- Operations Research
- Industrial Engineering
In addition, the Volpe Center requires skills in a wide spectrum of other disciplines, including economics, program management, earned value management, financial management, emergency response as related to transportation, man-machine interface analysis and development, risk management, and information systems. Work under this contract may address all transportation modes — air, surface, marine, and potentially space. Current indications are that the largest volume of tasking will be in the aviation area, specifically in support of the Next Generation Air Transportation System (NextGen) which will leverage new technologies to transform the National Air System (NAS) into a safer, more secure system while improving the capacity of air transportation systems. There may also be tasking in the area of surface transportation, including, but not limited to, motor vehicle crash avoidance technologies and transit/traffic management systems. Representative work areas under this contract are described in Section C.3

The Contractor may be required to provide administrative and logistic services that are an integral and interconnected part of TMIS work performed. These support services may include business and technical writing, development of presentations, graphic arts design and production (demonstrations); and organizing, and/or participating in conferences, meetings, or symposia.

Work area requirements include:

- Strategic Planning and Architecture Analysis
- Air Traffic Management (ATM) Systems
- Position, Navigation and Timing (PNT) Systems
- Surveillance Systems / Automatic Dependent Surveillance – Broadcast (ADS-B)
- Communication Systems
- System Engineering
- System Innovative Technologies

C.3 AREAS OF WORK

C.3.1 Strategic Planning and Architecture Analysis

This work area covers, but is not limited to, the need, conceptualization, definition and planning of traffic management systems. Work will take into account transportation needs, present and/or planned systems, current and emerging technologies, policy guidance concerning future directions provided by the sponsoring organization and national commissions such as the JPDO, and economic, environmental, legal, and management factors. In general, the products of the work performed in this area will provide support to Government officials in making its decisions concerning proposed TMIS programs, and may address all modes of transportation, including air, surface, marine and potentially space.

TMIS programs identified as transformational include ADS-B, System Wide Information Management (SWIM), Data Communications, NextGen Network Enabled Weather (NNEW), and, relative to surface transportation, IntelliDrive℠ (see http://www.intellidriveusa.org). Other
TMIS programs identified as enabling the NextGen include: Cockpit Display of Traffic Information (CDTI), En Route Automation Modernization (ERAM), Integrated Terminal Weather System (ITWS), Ground-based Augmentation System (GBAS), Terminal Automation Modernization Replacement (TAMR), Tower Flight Data Management (TFDM), Traffic Flow Management – Modernization (TFM-M), and Traffic Management Advisor (TMA) enhancements. Although many of these programs are underway at the FAA, it is anticipated that work in this area may include definition of future segments and enhancements. Other TMIS programs could include technologies such as HSR.

In this work area, the Contractor may be required to perform, but not be limited to:

- Formulate strategic plans and develop the concept of operations for a new capability (e.g., an airports surface traffic management system).
- Provide recommendations for research and development programs in support of new initiatives and programs (e.g., an auto/truck traffic management system using in-vehicle transponders or, similarly, rail or marine vehicle/vessels to other management systems).
- Conduct research in support of formulating goals and objectives for new capabilities (e.g., trajectory-based aircraft traffic management).
- Provide comprehensive system analyses and syntheses for a new capability (e.g., networked surface traffic sensors).
- Develop or refine enterprise architectures describing national-level systems and support in the decomposition of architectures into functional components and program products (e.g., new paradigms for a vessel traffic management system).
- Develop the frameworks and/or strategic plans for dealing with the non-technical factors, such as the institutional, financial, and legal aspects of traffic management systems at the federal level (e.g., a civil-only satellite-based navigation system).
- Evaluate technical feasibility of a proposed new traffic management system (e.g., a new general airport surveillance radar utilizing a low-cost electronic phased-array technology).
- Develop cost estimates, analyze benefits, and perform trade-off studies to support the economic feasibility of proposed traffic management systems and solutions (e.g., the NextGen super-density concept).
- Develop environmental studies, including impacts such as noise, fuel consumption, and emissions, for proposed traffic management systems and solutions. These studies can use existing environmental analysis tools, potentially augmented with supplemental tools and methods.
- Construct proof-of-concept models, prototypes, and/or initial capabilities of NextGen or other transportation traffic management systems (e.g., a specific trajectory-based TM scheme).
- Provide support for TMIS global harmonization standards and specifications development through participation in committees, meetings and workgroups.
- Develop system architectures to achieve improved management and control of vehicles (surface, marine, and air) in the efficient and safe movement from their origin to their destinations. These architectures will account for all systematic, demand-driven, atmospheric, environmental, interoperative capabilities, safety systems and human performance constraints placed upon the systems. Services may include development of concepts for the system solutions and/or analysis of the operations. Systems may require human-in-the-loop (HITL) and automation control of vehicle spacing to achieve optimal throughputs without compromising safety.
- Ensure that the systems architecture encompasses the optimal man-machine interfaces necessary to meet the system-wide goals.
• Devise system architecture techniques, methodologies, and algorithms that allow the synthesizing of various navigation, surveillance, communication, and control data inputs to aid in decision making.
• Provide support for the development of roadmaps that enhance and facilitate automation systems that predict the desired routes of vehicles and their future positions with respect to time and location from past positions, velocities, acceleration, and vehicle intent.

C.3.2 Air Traffic Management (ATM) Systems

This work area covers ATM systems. The International Civil Aviation Organization (ICAO) defines ATM as “the aggregation of the airborne functions and ground-based functions (air traffic services, airspace management, and air traffic flow management) required to ensure the safe and efficient movement of aircraft during all phases of operations.” Activities in this work area relate to systems at various stages in their development, including initial research, design feasibility studies, design and development testing, implementation, and continued operation and maintenance.

Given that the FAA is a major sponsor of the Volpe Center’s work in ATM systems, understanding the FAA’s approach to ATM within NextGen is essential to understanding the nature of the Volpe Center’s future efforts in this work area. The data requirements for ATM system operation and validation require the use of several commercially available data resources, including the Performance Data Analysis and Reporting System (PDARS) and Terminal Area Route Generation, Evaluation, and Traffic Simulation (TARGETS).

FAA activities leading to NextGen operational improvements are planned and categorized by the solutions that they support. The FAA’s solution portfolio is organized into seven solution sets, each focusing on a series of related operational capabilities. The seven solution sets are:

• Initiate Trajectory Based Operations
• Increase Arrivals/Departures at High Density Airports
• Increase Flexibility in the Terminal Environment
• Improve Collaborative Air Traffic Management
• Reduce Weather Impact
• Improve Safety, Security, and Environmental Performance
• Transform Facilities

In addition, other new programs that directly support the transformation to NextGen in the NAS include: ERAM; ITWS; Terminal Data Distribution System (TDDS); NNEW; SWIM; TAMR - Phases 1, 2, and 3; TFDM; TFM-M; and enhancements to the TMA. This list is not inclusive of all ATM programs that may be supported under this work area as there are interdependencies with other programs to transform the NAS that are primarily covered by other communication, navigation, and/or surveillance task areas. There are also existing ATM programs that may require support in the future; e.g., the Enhanced Traffic Management System (ETMS) and Collaborative Decision Making (CDM) initiatives.

Supporting the achievement of capabilities defined within the NextGen solution sets is expected to be a major aspect of this work area. Activities defined in the solution sets are intended to be representative of actual work that may be performed under this contract. These support activities are heavily focused on, but not limited to, the design, development, deployment, and integration of future NextGen systems, capabilities, and concepts. A wide array of datasets will need to be
accessed and analyzed as part of this work area; major among them is the commercially available PDARS data.

C.3.2.1 Initiate Trajectory Based Operation (TBO)

Trajectory based operations are a shift from clearance based to trajectory based control. Aircraft will fly negotiated trajectories, and air traffic control will transition to management by trajectory; the traditional role of the pilots/controller will evolve due to the increase in automation, support, and integration.

The “Initiate Trajectory Based Operations” solution set focuses primarily on high-altitude cruise operations in en route airspace, although its effects will impact all phases of flight. It is dependent on: data communications, ADS-B, CDTI, SWIM, ERAM, TFM-M, Required Navigation Performance (RNP), Area Navigation (RNAV), Oceanic Avionics, 4-Dimensional (4-D) trajectories, NAS Voice Switch, flight object, Flight Management System (FMS) Auto Load, training, procedures, airspace redesign, and automation enhancements, including those to meet more stringent safety requirements.

ATM work related to TBO may include, but is not limited to: assessing flexible airspace and dynamic resource management using TBO and its impact on TFM; creating trajectory based reroute modeling and development of detailed specifications and a near-term implementation approach; ensuring that TBO is supported by the flight object through participation in the SWIM Flight and Flow Community of Interest (COI); evaluating the flight object as a trajectory based interface between (1) ERAM and TFM, and (2) NAS users (commercial, general aviation, state, and military) and the FAA and its NextGen capabilities/systems; performing point-in-space metering; integrating air-ground man-machine interface assessment of TBO; and developing or refining TMA enhancements.

C.3.2.2 Increase Arrivals/Departures at High Density Airports (HD)

The “Increase Arrivals/Departures at High Density Airports” solution set involves increasing operations at airports where there is potential for airspace or approach interference from other airports in close proximity, high demand for the runway capacity, or multiple runways with both airspace and taxing interactions. This solution set is dependent on: data communications, terminal automation platform enhancements, RNP/RNAV, ADS-B, SWIM, TFM-M, flight object, data communications, NAS Voice Switch, FMS Auto Load, 4-D trajectories, training, Safety Management System (SMS) processes, and airspace redesign. It also depends and expands on the capabilities of the “Flexible Terminals and Airports” solution set described in section C.3.2.3.

ATM work in this area may include, but is not limited to: supporting the implementation of TMA and Time-Based Flow Management (TBFM); assessment of en route time-based metering (TBM) procedures; assessing integrated arrival/departure management in major metropolitan areas; supporting the definition and development of TDSS in connection with SWIM; and assessing TBM using RNP/RNAV route assignments.

C.3.2.3 Increase Flexibility in the Terminal Environment (FLEX)

The “Increase Flexibility in the Terminal Environment” solution set will provide the enhanced capabilities necessary to manage the separation of aircraft at and around all airports. Flexible terminal operations include a mix of Instrument Flight Rules/Visual Flight Rules (IFR/VFR) traffic with aircraft types ranging from scheduled airline operations to the recreational pilot. FLEX is dependent on: ADS-B, CDTI, SWIM, RNP/RNAV, 4-D trajectories, NAS Voice
Switch, data communications, GBAS, SMS processes, and terminal automation platform enhancements.

ATM work in this area may include, but is not limited to: providing surface situational awareness information to aircraft operators and other users of ATM information; evaluating the impacts, benefits, and costs of continuous descent arrival procedures on noise, emissions, and fuel burn; defining wake vortex procedures; supporting the development of standard approach and departure procedures; conducting concept engineering analysis and support vis-à-vis Required Time of Arrival (RTA); and assessing the benefits and impacts of new approach and departure procedures in the traffic flow environment.

C.3.2.4 Improve Collaborative Air Traffic Management (CATM)

The “Improve Collaborative Air Traffic Management” solution set includes flow programs as well as collaboration on procedures that will establish balance by shifting demand to alternate resources (e.g., routings, altitudes, and times). CATM will bring together NAS status information (from multiple automation systems) into a common electronic format to enable improved flight planning. CATM will enable advanced methodologies to determine routing options as well as dynamic airspace sector boundaries and configurations to grant more flexibility in managing traffic. CATM is dependent on ADS-B, SWIM, data communications, SMS processes, airspace redesign, ERAM, TFM-M, flight object, and NAS Voice Switch.

ATM work in this area may include, but is not limited to:

- Providing support to Airspace Flow Programs (AFPs) in the current CATM tools environment
- Developing reroute impact assessment (reroute modeling) and other decision support tools that allow traffic management specialists to automatically predict and examine the impacts of proposed Traffic Management Initiatives (TMI)
- Exchanging flow strategies with air traffic control
- Evaluating trajectory flight data management techniques, including flight object
- Developing a common geospatial reference system encompassing appropriate aeronautical and meteorological information to facilitate increased levels of collaboration and common situational awareness across traditional geographic and organizational boundaries
- Developing enhancements to TFM capabilities and probabilistic tools to improve the management of uncertainty
- Supporting the integration of weather into TFM capabilities
- Developing a unified approach to flight planning
- Developing a TFM capabilities roadmap
- Conducting HITL and Fast-Time Simulations (FTS) in support of the Multi-Sector Planner (MSP) and other Advanced Methods (AM) concepts
- Supporting transition activities between ETMS and TFM-M
- Supporting the SWIM program and SWIM COIs

C.3.2.5 Reduce Weather Impact (RWI)

The “Reduce Weather Impact” solution set includes enhancements to weather information and its use to improve safety, capacity, and efficiency. RWI is dependent on: integration of weather processing and forecasting via NNEW, ADS-B, SWIM, ERAM, advanced surface automation, terminal automation platform enhancements, TFM-M, weather sensors, airspace redesign, SMS processes, and 4-D Trajectories.
ATM work in this area may include, but is not limited to: deployment of ITWS capabilities, prototyping of NextGen weather impact translators, and supporting the NAS Enterprise Architecture for dissemination of weather information to interests outside the SWIM Weather COI.

C.3.2.6 Improve Safety, Security, and Environmental Performance (SSE)

The “Improve Safety, Security, and Environmental Performance” solution set involves activities directly related to ensuring that NextGen systems contribute to steadily reducing risks to safety and information security while mitigating adverse effects on the environment and ensuring environmental protection that allows sustained aviation growth. SSE analysis activities may derive from or correlate with any of the support requirements defined within each of the five prior solution sets.

Work in this area may include, but is not limited to: design, development, and deployment of the Security Integrated Tool Set (SITS) system; performance of information system security engineering tasks, including development and execution of Information System Security Plans (ISSP), Certification and Authorization packages, and System Certification and Authorization Packages (SCAP); environmental impact and risk analyses of NextGen systems and components as they relate to fuel consumption, noise, local air quality, and global emissions; evaluation of preliminary engineering candidate concepts and systems, refinements of operation concepts and requirements; investment analysis; trade-off analysis of routing and scheduling optimization against safety, environment, and cost considerations; and analyses of the impacts of air traffic on the environment. Similarly, corresponding security activities may be required relative to motor vehicle electronic control systems and corresponding environmental activities may be required relative to IntelliDrive Applications for the Environment: Real-Time Information Synthesis program (AERIS (www.its.dot.gov/factsheets/pdf/JPO-024%20AERIS%20V5.5.1%20F.pdf)).

C.3.2.7 Transform Facilities

The Transform Facilities solution set focuses on capabilities that enable a network of integrated facilities designed to support the delivery of safer and more efficient operations system-wide. It enables a facilities infrastructure that supports NextGen and other transportation related facilities (i.e., rail, HSR, ground, and marine) capabilities as they are integrated into the current system and as they mature over time. Business continuity is built into the system and provides for a more resilient infrastructure, better contingency operations, and a higher degree of service. This solution set includes multi-discipline laboratories and test beds to support NextGen or other transportation mode requirements development and risk-mitigation efforts.

Work in this area may include future facilities investment planning that may involve conducting the detailed engineering necessary to develop comprehensive facility requirements for future transportation facilities; integration, development, and operational analysis that may involve prototyping and assessing the transition to NextGen or other transportation capabilities and conducting man machine interface simulations; and test bed demonstration that may involve, but not be limited to, testing of operational improvements during all phases of flight that will allow the integration of new and emerging technologies or applications into existing or planned NAS or other transportation infrastructure enhancements.
C.3.3 Position, Navigation and Timing (PNT) Systems

This work area addresses the planning, development, and utilization of PNT systems for solutions to present and future transportation needs. Work in this area includes, but is not limited to, assessing PNT requirements for transportation systems, making recommendations for navigation technology to fulfill previously established requirements, performing analyses of the capabilities of current and future PNT systems, and performing technical and cost-benefit analyses on present and proposed navigation systems and concepts.

The Contractor may be required to provide support for the following operating or developing GNSS:

- The NAVSTAR Global Positioning System (GPS), the Galileo satellite navigation system, and the Global Navigation Satellite System (GLONASS), Space-based augmentation systems to GNSSs, including the Wide Area Augmentation System (WAAS), the European Geostationary Navigation Overlay Service (EGNOS), the Multifunctional Transport Satellite (MTSAT), and the GPS and Geo-Augmented Navigation (GAGAN) system
- Ground-based augmentation systems to GNSSs, including the Local Area Augmentation System (LAAS)
- Existing U.S. air transportation system: transition to the NextGen Air Transportation System
  - Very High Frequency Omni Directional Range (VOR)/Distance Measuring Equipment (DME)/Tactical Air Navigation System (TACAN)
  - Inertial Navigation System (INS) - gimbaled, strap down and space-stable mechanizations
  - Radio beacons - unmodulated and modulated with GNSS corrections in various formats
  - Instrument Landing System (ILS)
  - Microwave Landing System (MLS)
  - Electronic map or chart databases

The Contractor may be required to support activities that address:

- GPS modernization reflected in the Block IIR-M and IIF satellites
- Delayed implementation of GPS L2C and L5 signals, constellation replenishment, schedules, and onset of increased solar activity
- Selecting a future radio navigation systems mix
- Harmonizing the evolving civil and military requirements and policies for GPS
- Current gaps in GPS PNT service; e.g., hostile jamming or spoofing environments, continuing to meet civil and military signal integrity requirements (in addition to current system improvements such as a new military signal on L1 and L2 and flexible power for PPS L1 and L2)

The Contractor may also be required to perform assessments that involve collection of laboratory and field test data, review reports with technical experts, and build prototype systems. This may involve, for example, supporting FAA studies currently underway to determine whether LAAS meets the requirements for Category II and III precision approach operations.

The Contractor may be required to conduct performance analyses and evaluation of current operational systems and to assess the need for new PNT systems and/or analyze proposed PNT
systems to determine whether the proposed systems can be expected to satisfy projected needs/requirements developed by the Government (e.g., Nationwide Differential GPS). In performing these studies and evaluations, the Contractor may be required to perform simulation, modeling, and/or theoretical analyses; develop prototype hardware and software; and perform field testing. Additionally, the Contractor may be required to perform trade-off studies and to evaluate transition strategies, including the phasing-in/-out of existing systems and the scheduling of changeovers. Examples of proposed systems that the Contractor may be required to assess include:

- Hybrid combinations of GNSS and INS
- Obtaining GNSS augmentation signals via a commercial terrestrial transmitter or geostationary satellite
- Satellite-based systems versus ground-based systems
- Use of GPS in National Aeronautics and Space Administration’s (NASA) outer space projects and operations
- Laboratory, field, and flight tests of radio frequency (RF) interference location systems
- Radio wave propagation (for frequencies from 10 KHz through 2 GHz covering Loran through GPS) to determine statistics for the PNT system availability, accuracy, and integrity

Research continues at NASA on using GPS signals for science observations and applications requiring high precision. Examples include:

- Using signals for atmospheric research using occultation measurements through the Earth's atmosphere
- Observations of signals reflected off the Earth's surface
- Measurements used in geodetic applications

C.3.3.1 Geodetic Reference Frame

NASA has undertaken the task of coordinating efforts among Federal agencies to identify the geodetic requirements to meet future PNT requirements. The Department of Defense (DoD) is currently assessing Satellite Laser Retro-reflectors (SLR) as a potential payload on GPS III-B and evaluating any integration/compatibility risks as well as identifying cost and schedule impacts.

The Contractor may be required to:

- Support activities involving the GPS Continuously Operating Reference Stations (CORS), which provides land surface centimeter-level positioning capability in the U.S. The CORS network contains about 1,300 stations
- Support Maritime Domain Awareness (MDA) activities such as the Automatic Identification System (AIS) used for vessel traffic control around busy seaways
- Develop GPS Radiofrequency Interference (RFI) mitigation techniques

The primary method of interference mitigation is provided by coordinated Government enforcement response to interference reports and information distribution (e.g., United States Coast Guard Navigation Center, FAA NAS Operational Control Center, United States Strategic Command GPS Operation Center). Outage risks can be mitigated in part if the user makes a correct assessment of requirements and implementation of appropriate backup systems or procedures for each individual application.
C.3.4 Surveillance Systems/Automatic Dependent Surveillance-Broadcast (ADS-B)

This work area covers, but is not limited to, the planning, development, and utilization of surveillance sensors and systems for solutions to present and future transportation needs and challenges. The Contractor may be required to provide support to transportation activities associated with concept initiation, analysis, design, development, testing, integration, and evaluation of surveillance sensors and systems for all modes of transportation — air, surface, marine, and potentially space. Surveillance in this context refers to both:

- Monitoring a set of characteristics (e.g., identification, location, velocity, size, orientation, and intent) of a vehicle (e.g., aircraft, ships, or cars/trucks) conveying passengers and/or cargo from a location other than on-board the vehicle being monitored
- Monitoring a set of characteristics of non-vehicle entities that may affect and, particularly, may constitute a hazard or impediment to the safe and efficient transportation of passengers and cargo, including weather phenomena, emissions, and flow wakes from other vehicles, terrain, man-made objects fixed to the ground, debris, and vapors/particulate matter (e.g., volcanic ash).

This work area is divided into sub areas addressing non-ADS-B and ADS-B activities.

C.3.4.1 Non-ADS-B Activities

This work area covers the planning, development, and utilization of surveillance sensors and systems for solutions to present and future transportation needs excluding aviation ADS-B. Surveillance sensors and/or systems addressed within this work area may in the case of vehicles be either non-cooperative or cooperative, depending upon whether or not equipment must be installed on the vehicle being monitored. Non-cooperative surveillance technologies may be either active (e.g., requiring transmission of energy by the surveiller) or passive (e.g., relying on energy or matter naturally emitted or disturbed by the entity under surveillance. Non-cooperative surveillance may utilize (a) energy in any of many forms, including acoustic (frequencies from infrasonic to ultrasonic), electromagnetic (EM) radiofrequencies, EM microwave frequencies, infrared light, visible light, or ultraviolet light or (b) matter in any of several forms, including fluid flow and particulates in the ambient environment or emitted by a vehicle.

Examples of work that may be required are:

- Feasibility analyses of new or significantly improved surveillance sensor and/or system concepts — i.e., low-cost X-band radar for detecting convective weather activity near medium-size airports and radar or detection systems for rail vehicle to wayside activities
- Cost-benefit analyses and Cost & Operational Effectiveness Analysis (COEA) on new surveillance sensors/systems; e.g., sensor for detecting cloud-to-cloud lightning before lightning ground-strikes occur
- Requirements analyses, concept definition, and design and development of prototype systems; e.g., snowfall detector for interstate highways
- Specification development and refinement; e.g., low-cost radar for Foreign Objects and Debris (FOD) on the airport surface
- Performance analyses of Airport Terminal Area and Airport Surface Surveillance systems
- Performance analyses of automated weather observing systems and vortex and wind shear sensors and systems
- Field or flight test evaluation of sensors and systems; e.g., Runway Visual Range (RVR) sensor based on new emitter and/or detector technology
- Installation, test, and evaluation of systems in an operational environment (sensor/tracking/communications, etc.); i.e., airports, shipboard wayside, rail, and roadway systems
- Design and development of data reduction and analysis software
- Sensor and system simulation
- Integration of various ground-based sensor and tracking systems, including data fusion techniques, data management, and methods of portraying information
- Requirements analysis for interfacing surveillance sensors with communications and automation systems
- Risk and/or threat assessment of proposed or existing surveillance systems.

C.3.4.2 ADS-B Activities

The Volpe Center supports the nationwide implementation of ADS-B and related Traffic/Flight Information Systems – Broadcast (TIS-B/FIS-B). The Initial Operating Capability (IOC) of Surveillance Services has been obtained for the key sites of Louisville, the Gulf of Mexico, Philadelphia and Juneau. The Final Rule requiring ADS-B avionics to operate in certain airspace by 2020 was published in May 2010. Each key site was chosen because it utilized a different air traffic control automation platform with which ADS-B must be integrated. The key sites and corresponding automation platforms are the Common Automated Radar Terminal System (CARTS) in Louisville, the Host automation system in Houston supporting the Gulf of Mexico, the Standard Terminal Automation Replacement System (STARS) in Philadelphia, and the Microprocessor En Route Automated Tracking System (MEARTS) in Juneau. The FAA achieved the In Service Decision (ISD) to use ADS-B for Air Traffic Control (ATC) separation services (also known as “critical services”) in September 2010. ISD authorizes deployment of a solution into the operational environment. The ISD consists of the Operational Test Reports, Independent Operational Test Reports (IOT&E), ISD checklist, safety risk management document and system safety assessment reports, information security certification and authorization, and the ISD action plan. The Contractor may be required to support the Volpe Center and the FAA in updating the reports and completing the action plans.

The Contractor may be required to provide support to the Volpe Center and the FAA to achieve full implementation of ADS-B in the NAS. This work may include implementation of ground stations, equipage of commercial aircraft, and integration with other air traffic control automation platforms. Prior to ISD, IOT&E was conducted at each key site to identify and assess any operational and safety risks. The Contractor may be required to provide support to the Volpe Center and the FAA to continue to address these issues/risks, implement any required fixes to the system, conduct further tests, and develop action plans for unresolved issues.

The Contractor may be required to provide support to the Volpe Center and the FAA to collect and analyze more data to support terminal ADS-B separation services. It is not possible to cover every permutation of ADS-B and automation platform at this time. The Contractor may be required to provide technical support to address additional ADS-B capabilities/functionalities through the use of ISD action plans as defined by the FAA at the time of ISD. The ISD action plans shall address:

- Terminal separation services prior to first production sites (ADS-B to ADS-B and ADS-B to Radar)
- En Route Separation with ADS-B integrated into ERAM
- En Route Separation with ADS-B integrated into Advanced Technologies and Oceanic Procedures (ATOP)
- Investigation of potential alternatives to provide terminal separation services with ADS-B integrated into MEARTS

Each action plan shall at a minimum contain a Safety Risk Management Document (SRMD); a plan for operational testing including flight checks; and strict configuration management through the use of NAS Change Proposals (NCPs).

Support for implementation of ground stations, aircraft equipage, and integration with other air traffic control automation platforms that the Contractor may be required to perform includes, but is not limited to:

- System Engineering, including specifying, assessing and validating ADS-B/TIS-B/FIS-B performance in regard to integration with the automation platforms, and support for Ground-based Interval Management (GIM)
- Field engineering services, including planning for and monitoring the full implementation of ADS-B/TIS-B/FIS-B ground stations
- Risk Management, updating SRMDs; identifying, monitoring, assessing and mitigating technical, cost, and schedule risks
- Data and Performance Monitoring to support terminal ADS-B separation services
- Operations Support for integration with other ATC automation platforms
- Program management support, including, but not limited to, support for communications with the users and other Government entities, schedule development, financial management, and earned value management.

C.3.5 Communication Systems

This work area covers the planning, development, and utilization of communications systems for solutions to present and future transportation needs and challenges. The Contractor may be required to support a broad range of network and/or communication programs and applications, including ground-based networks, terrestrial radio systems, satellite communications systems, and other communication systems. Work in this area may include, but not be limited to, management; planning; system design/engineering; and system certification, test, and evaluation of communication systems. In terms of radio communications, Contractor support may be required for digital fixed, mobile (including 5.9GHz Dedicated Short Range Communications (DSRC)), and aeronautical communication systems and technologies.

C.3.5.1 Network Management

The Contractor may be required to support specific investigations pertaining to network management. For purposes of this contract, network management is defined as policy considerations, security and emergency response; development of tools for network management and planning, administration, budgetary analysis and projections, and related training. Examples of work required include, but are not limited to:

- Planning, design, engineering integration, implementation, test, and support for computer networks and all associated Information Technology (IT) infrastructure
- Analysis of policy for network management, planning, and configuration control
- Budget analysis, review, and forecasting, including cost tracking and impact assessments
- Specification and dissemination of network standards and protocols
• Preparation and maintenance of technical specifications, orders, and directives related to the operation and management of IT infrastructure components
• Definition, development, and implementation of contingency plans and procedures
• Identification and assessment of current network technologies as well as future network trends
• Assessment and monitoring of network performance, reliability, and security
• IT transactional analysis methodology and troubleshooting
• Information System Security assessments, testing, and documentation
• Training in network management

C.3.5.2 Network Planning and System Engineering
The Contractor may be required to support the Volpe Center in conducting network planning and system engineering. These activities include technical and management analysis; studies; design and operational support for information systems and software engineering, including architectures, data management strategies, and development; requirements analysis; alternatives analysis; feasibility studies; cost/benefit analysis; operational plans; performance measurement and operational capability support; strategy development; implementation; integration; testing; and maintenance. Examples of work required include, but are not limited to:

• Requirements and specifications gathering, resource ordering, developing implementation and integration plans, and installing and configuring services
• Network system engineering tasks ranging from functional and technical system requirements and specifications to overall system design, acquisition, service, implementation, integration, test, evaluation, and troubleshooting
• Specification and development of criteria and methodologies for measuring and assessing network and system performance
• Design and development of tools and automation aids for network and system design, monitoring, configuration, and management
• Analytical and discrete event modeling of computer network traffic loads
• Technical performance, reliability and risk trade-offs, cost-benefit studies, and economic risk analyses for networks and candidate technologies
• Technology forecasting and cost estimates
• Modeling and computer simulation of network, system, and application performance analysis
• Developing policies, procedures, and test methods to ensure network infrastructure reliability and accessibility as well as to prevent and defend against unauthorized access to networks, systems, and data
• Information System Security training

C.3.5.3 Terrestrial and Satellite Radio Communications
The work in this area covers the planning, development, and utilization of terrestrial and satellite analog and digital radio equipment and systems for solutions to present and future transportation needs. The Contractor may be required to provide technical support to facilitate development of advanced radio communications systems for fixed point-to-point, fixed point-to-multipoint, fixed to land/marine mobile, and fixed to aeronautical services. Contractor work may include requirements analysis; concept development; feasibility and trade-off studies; spectrum utilization and cost-benefit studies; system engineering and design; interface analysis; hardware and software specification as well as evaluation; technology assessments; test planning and implementation; and data collection, reduction, and evaluation. For example, the work may include, but not be limited to:
Concept definition and planning for a pilot-controller communications system utilizing the current Very High Frequency (VHF) aeronautical communications band that has sufficient capacity for a factor-of-three traffic growth while improving on current signal-to-interference levels

Concept definition and planning for a rate (e.g., 1 Mb/sec) air-ground data link that provides for ATC communications, airline (e.g., pilot-dispatcher) communications, and passenger communications with a dynamic prioritization scheme

Data link requirements for GPS/GNSS applications, such as distribution of Differential GPS integrity and correction data for a space-based or ground-based augmentation scheme

Concept definition and planning for an airport-based wide area network that utilizes the 5091-5150 MHz band currently allocated to the MLS

Assessment of satellite technologies and trends

Recommendation of modulation and coding schemes for communication applications; e.g., analog and digital voice, “next generation” ADS-B

Prediction of fielded and planned communication system performance (with frequencies ranging from 100 MHz to 5.9 GHz) in terms of availability and reliability, signal-to-noise ratio, and message error rate

Survey and recommend a commercial communications service provider based on Government-provided requirements for tracking and control of off-shore marine vessels and aircraft in oceanic airspace

Impact of international/domestic satellite systems regulation and institutional arrangements on service procurement and operations

Cost-benefit analysis of satellite radio versus terrestrial radio versus landline telecommunication services for specific applications; e.g., networking surface traffic monitoring/control sites in a large metropolitan area

Support for implementation of ground stations in the continental United States and DoD facilities outside the continental United States, aircraft equipage, and integration with other air traffic control automation platforms.

C.3.5.4 Frequency Spectrum Engineering

The work in this area covers radio spectrum engineering activities associated with implementation of new traffic management systems and the maintenance of existing capabilities. The Contractor may be required to provide support in resolving the challenges that arise as new technologies such as ADS-B are deployed as the electromagnetic spectrum required for this new system has the potential to degrade the performance of currently deployed systems, particularly during the transition period when both generations of systems must operate simultaneously. For example, the work may include:

- Determination of optimal frequency band(s) in which to locate new systems
- Identification of system spectrum requirements and constraints
- Analysis and selection of communication techniques necessary to implement systems within spectrum constraints
- Simulation of the system spectrum environment in order to check for spectrum-related concerns such as co-channel and adjacent-channel interference, inter-modulation products produced by various nearby emitters, industrial machinery-generated noise, and similar issues
Simulation of system components such as aircraft receivers or transportation-related emergency response equipment in order to verify their spectrum-related performance and to investigate and validate observed problems

Performance of laboratory and field tests necessary to validate the analyses and simulations

### C.3.5.5 System Wide Information Management (SWIM)

The work in this area covers the information exchange between systems based on the principles of a Service Oriented Architecture (SOA). The Contractor may be required to engineer, design, implement, integrate, test, and analyze the open, flexible, and secure IT infrastructures for NAS systems to share information, increase operability, and encourage reusability of information and services. Additionally, the Contractor may be required to develop conceptual and requirements documents. The following work may be required:

- Establishment of engineering processes to monitor, control, and oversee engineering activities.
  - Examples of work that may be required include, but are not limited to, designing and developing engineering processes to support programmatic and technical activities
  - Support the implementation, institutionalization, and adoption of engineering processes
  - Assess, implement, deploy, and administer automated tools that facilitate engineering activities

- NAS integration engineering and analysis, including but not limited to:
  - Integration support to SWIM Implementing Programs (SIPs)
  - Defining/registering an individual SWIM service with the FAA’s NAS Service Registry/Suppository (NSRR), enabling the design-time discovery of NAS services
  - Interface definitions and application integration mechanisms
  - Transition issue identification and resolution

- Engineering and analysis associated with design and implementation of the SWIM infrastructure and SWIM core services

- Concept and requirements development, validation, analysis, and documentation, including but not limited to:
  - Core capabilities concepts and requirements, segment capability concepts research, and development
  - Conduct technical reviews; provide support for development of and provide analysis, comments, updates, and recommendations for documentation involving concepts of use, concepts of operations, system requirements, service specifications, SIP engineering artifacts, interface controls, interface requirements, and core services standards

- Functional, physical, data, and enterprise architecture analysis and development for all SWIM segments, including but not limited to:
  - Architectural element definition (e.g., conceptual data models, taxonomies, SOA technologies and standards, and architecture views required by the Office of Management and Budget (OMB)
  - SWIM NAS Enterprise Architecture Views
C.3.5.6 Data Communications (Data Comm)

The FAA has established an operational plan for the ATM system of the twenty-first century under the NextGen program. Data Comm is a key element of the transition from the current analog voice-only air-to-ground communications system to a system in which digital communications becomes an alternate and eventually predominant mode of communication. The NAS Concept of Operations and Vision for the Future of Aviation and the JPDO concepts of use require communication of complex trajectory clearances, weather information, and air traffic advisories. In the future ATM environment, it will no longer be possible to rely exclusively on voice messages for the exchange of information. Transition from voice for pilot-controller communication to a mixture of voice and data communication has been identified as a key goal for ATC.

Data communications will provide an additional means for two-way exchange between controllers and flight crews for ATC clearances, instructions, advisories, flight crew requests, and reports. Information will be uplinked to the cockpit allowing for better route and altitude planning. As experience is gained, routine communication will be increasingly handled by data communications for appropriately equipped users.

The underlying concepts for the data communications services are described in the Communications Operating Concept and Requirements (COCR) for the Future Radio System, COCR Version 1.0. The addition of data communications will support improvements in airspace use and capacity. Data communications will:

- Provide for a more efficient air/ground (A/G) information exchange mechanism
- Provide an additional means of communication between pilots and controllers
- Reduce congestion on the voice channels
- Reduce operational errors and pilot deviations resulting from misunderstood instructions and read back errors
- Enable trajectory based operations

Data communications in the NAS is envisioned to be implemented in three segments to meet the mission shortfalls in a practical, evolutionary approach.

- Segment 1 will facilitate data communications deployment and introduce initial 4-D (latitude, longitude, altitude, and time) routes
- Segment 2 will introduce conformance management and initial 4-D agreements
- Segment 3 will expand 4-D agreements and provide an operational environment that allows the transfer of some separation assurance tasks from the ground to the air

The Contractor may be required to provide support in the following areas:

- Planning, scheduling, project control, risk management and earned value management expertise to support lifecycle program management
- Systems and requirements engineering, safety engineering, operational integration, aviation data communications analysis, and air-to-ground Data Comm system analysis
Aircraft avionics development oversight
- System definitions, architectures, requirements baselines, functional baselines, system and subsystem specification documents, interfaces, and program requirements documents
- Internal and external communications; outreach and information dissemination to airspace users and the flying public; and coordination and education activities such as the development of trial plans, procedures, implementation, and fielding, including the development of training syllabuses and materials for associated trial and demonstration training
- Development of test plans, test procedures, test cases, and required tools to evaluate system and subsystem performance in order to assure successful introduction of A/G Data Comm into the NAS

In addition, the Contractor may be required to:
- Provide input to the Government for the development of regulatory material to permit safe and secure introduction of Data Comm Avionics into the NAS
- Provide input to the Government for the development of international standards that specify aviation safety, performance, and interoperability requirements

C.3.6 System Engineering

The existing systems and methodologies of the NAS and other transportation modes have proven to be extremely safe and reliable but are nearing their performance limitations due to a new set of systems, methodologies, and procedures that utilize different technologies and paradigms, yet hold the promise of higher levels of safety and efficiency. Thus, the transition from the existing NAS system to NextGen technologies and operational concepts and from existing transportation systems to updated modal transportation technology will require a wide array of system engineering skills. These skills include architecture definition, performance modeling, environmental impact modeling, alternatives and gap analyses, cost-benefit analysis, safety assessment, test planning, and test data analyses.

In support of this task, the Contractor shall perform, but not be limited to, the following System Engineering activities for transportation systems:
- Provide comprehensive system engineering to support identification of the most beneficial operational capabilities for near- to-mid term implementation
- Support planning activities for NextGen geared at prioritizing operational capabilities and implementation
- Provide recommendations for concept demonstration programs in support of NextGen initiatives
- Support for the development of proof-of-concept models, prototypes, and/or initial capabilities of NextGen or other types of transportation systems
- Review and analyze technical and integration issues of proposed system architectures and operations
- Evaluate cost estimates and analyze benefits to support the economic feasibility of proposed NextGen systems and solutions
- Conduct analysis of system engineering workforce needs
- Provide support for design and implementation of CNS systems
- Conduct analysis for determination of best practices for implementation of complex enterprise architectures
- Develop NextGen knowledge management framework
- Develop NextGen performance management framework
- Develop system concepts of operation
- Support in the functional analysis, feasibility analyses, and configuration and requirements management of NextGen traffic management systems
- Develop functional architecture definition and perform system requirements allocation and control
- Develop, analyze, and track Technical Performance Measures and other system and service metrics
- Develop and maintain environmental impact modeling tools for air, rail, and roadway transportation noise and emissions impact analyses, including the FAA Aviation Environmental Design Tool (AEDT), the Aviation environmental Portfolio Management Tool (APMT), and the Federal Highway Administration (FHWA) Traffic Noise Model (TNM)
- Perform environmental impact modeling and analysis, including air, rail, and roadway transportation noise and emissions impact analyses and cost/benefit analyses, at every stage throughout the transportation system
- Develop alternatives that mitigate the environmental impact of air, rail, and roadway transportation noise and emissions
- Perform definition, analysis, modeling, validation, verification, and management of system requirements
- Develop system test requirements
- Conduct feasibility tests
- Perform separation standards modeling, analysis, and testing
- Identify and assess system risks and develop plans to effectively mitigate these risks
- Perform interference modeling, simulation, and analysis
- Define and evaluate alternative solutions/methods of achieving the defined objective and desired performance of the system; conduct trade studies to analyze their relative strengths and weaknesses of each alternative
- Develop White Papers on FAA cross-agency NextGen issues
- Provide technical information and data for the development of NextGen Implementation and Integrations plans and briefings
- Evaluate the vulnerability of the system to unauthorized access and use or susceptibility to sabotage; assess the ability of the system to survive a security threat in the expected operational environment
- Provide support for design and implementation of systems to protect and defend against unauthorized access to transportation and traffic management systems (not to include security personnel)
- Support for implementation of communication, navigation, and surveillance ground stations in the continental United States and DoD facilities outside the continental United States (not to include construction)

The Contractor may be required to support Safety Engineering activities that include:

- Program Safety Plans (PSPs) which describes the project’s plan for addressing system safety and ensuring compliance with Air Traffic Organization (ATO) SMS provisions.
- All hazards assessments, including full systems approach, and plan development
- SRMDs that describe the change to the NAS associated with each demonstration program related system safety hazards and hazard tracking and risk resolution plans
- Operational Safety Assessments (OSAs) from the Concept of Operations documents
- Recommendations of safety risk mitigations with the affected program elements, including program management, implementation strategy and planning, and requirements development
- Coordination of responses to ATO System Safety Work Group (SSWG) comments on safety plans and SRMDs submitted for ATO SSWG review and approval
- Correlation and analysis of safety data/information for NextGen Integrated Safety Plan development

Successful execution of the NextGen program and other transportation activities requires that the economic impact be identified and estimated accurately and in a consistent manner. The costs and benefits to both the service provider (FAA or any other Government agency) and user organization (e.g., airline, air taxi operator or the traveling public) must be addressed by the responsible agency. In support of these initiatives, the Contractor may be required to perform the following economic analysis activities:

- Analyze and model the life-cycle cost and benefits of transportation programs and their component projects, both collectively and individually
- Estimate the variations of life-cycle costs and benefits due to changes in technical, design, configuration, schedule, support, interface, and implementation parameters
- Develop and document cost-benefit estimates and risk mitigation strategies to create a business case for NextGen initiatives

### C.3.7 Innovative Technologies

The work in this area covers the planning, development, and utilization of innovative technologies (sensors, systems, networks, engineering, fuels, testing, software, policies, and procedures) for solutions to present and future transportation needs and challenges. The Contractor shall provide support to transportation activities associated with concept initiation, analysis, design, development, testing, integration, and evaluation of innovative technologies for all modes of transportation — air, surface, marine, and potentially space. This work area includes, but is not limited to, the following areas:

- Optical, command, control, and communications (OC³) telemetry tracking systems. This work primarily covers application of OC³ systems such as a verification and validation tool for air, surface, and marine vehicles under developmental and operational testing. The vehicles include manned, unmanned, and hybrids.
- Neural Networks & Pattern Recognition Systems. This work covers the application of neural networks and pattern recognition technology as a means for surface (road, runway, taxi-way, etc.) deformation and possible FOD detection.
- Morphing Wing and Corona Airflow Control Technology. This work covers the investigation of morphing wing and/or corona airflow control technology and its application to wake turbulence mitigation and fuel savings. Other experimental or innovative airframe technologies such as winglet innovations may be researched, developed, and tested.
- Alternative fuel technologies. These may include those being researched by the FAA (e.g., Continuous Lower Energy, Emissions and Noise [CLEEN] and Commercial Alternative Aviation Fuel Initiative [CAAFI] programs) or other Federal agencies or commercial groups. Work may include development, research, and test.
- Central Data Warehouse. For Surveillance Information Design, populate and maintain a relational database of decoded surveillance data; e.g., Airport Surface Detection Equipment model X (ASDE-X), All-purpose Structured Euro-control Radar Information
(ASTERIX) category 10 or 11, WireShark CAP, CARTS, STARS, Common Digitizer Mode 2 (CD2), CDR, etc., to facilitate the rapid, accurate, complete, and comprehensive retrieval, organization, and reporting of such data collected under TMIS programs. Work items would include (1) defining table schema, (2) standardizing import/export requirements, (3) establishing and maintaining an SQL library of standard queries, and (4) maintaining storage efficiencies.

- **Meta-analysis Software Development.** Coordinate with the Volpe Center and the sponsoring agency to define requirements and specifications. Write and maintain analytical and reporting software for meta-analyses of previous TMIS studies to report aggregate results. Work items may include (1) gathering related study results in standardized form, (2) implementing meta-analysis analytical methods, and (3) documentation of capabilities.

- **Real-time Large-Scale Simulation Models.** Coordinate with the Volpe Center and the sponsoring agency to define model requirements and specifications. Write infrastructure code for and implement and maintain real-time large-scale TMIS simulation models for NAS operations and services. Work items would include (1) tracking and maintaining RTI requirements and specifications, (2) software implementation of Run Time Infrastructure (RTI) models, (3) performance of simulation studies, and (4) reporting and interpreting simulation results.

- **Embedded Hardware Surveillance Data Analysis Systems.** The development of embedded hardware, including Application Specific Integrated Circuits (ASIC), for use in aviation technologies so real-time data collection, analysis, and reporting may be used in traffic management control systems.

### C.4 GENERAL REQUIREMENTS

All electronic and information technology (EIT) deliverables rendered under this contract must comply with Section 508 of the Rehabilitation Act and the Access Board Standards available for viewing at [http://www.section508.gov](http://www.section508.gov).

SECTION D - PACKAGING AND MARKING

D.1 PACKAGING (MAY 1999)

The Contractor shall ensure that all items are preserved, packaged, packed, and marked in accordance with best commercial practices to meet the packing requirements of the carrier and ensure safe delivery at destination.

D.2 MARKING (MAY 1999)

All items submitted to the Government shall be clearly marked as follows:

a. Name of Contractor;
b. Contract number;
c. Task order number; (if applicable)
d. Description of items contained therein;
e. Consignee's name and address; and
f. If applicable, packages containing software or other magnetic media shall be marked on external containers with a notice reading substantially as follows: "CAUTION: SOFTWARE/MAGNETIC MEDIA ENCLOSED. DO NOT EXPOSE TO HEAT OR MAGNETIC FIELDS."
SECTION E - INSPECTION AND ACCEPTANCE

E.1 FAR 52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses, by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this /these address(es):

E.2 GOVERNMENT REVIEW AND ACCEPTANCE (JAN 2008)

A. Technical inspection and acceptance of all work, performance, reports, and other deliverables under this contract shall be performed at the location specified in the individual task order. The task order shall also designate the individual responsible for inspection and acceptance as well as the basis for acceptance. Task order deliverable items rejected shall be corrected in accordance with the applicable clauses.

B. Unless otherwise stated in the individual task order, the Government requires a period not to exceed thirty (30) calendar days after receipt of the final deliverable item(s) for inspection and acceptance or rejection. Final acceptance rests with the Contracting Officer or designee.

C. Inspection and acceptance of supplies/services for performance-based task orders (i.e., FFP, CPAF, and CPFF - completion) shall have identifiable performance measures and metric/quality acceptable levels that will form the basis of the inspection and acceptance criteria. For each performance-based task order, the Government will develop a quality assurance plan for use in monitoring Contractor performance against the performance measures and metric/quality acceptable levels that shall be clearly defined. The quality assurance plans will be developed at the task order level.

D. The Government has the right to inspect all supplies and services required by the individual task orders, to the extent practicable, at any and all places and times and in all circumstances or event before acceptance.
SECTION F - DELIVERIES OR PERFORMANCE

F.1 FAR 52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses, by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

F.2 CONTRACT PERIOD OF PERFORMANCE (FEB 2011)

This contract shall become effective on the date the Contracting Officer (CO) signs the contract. The ordering period and performance period will begin on the date of contract award. The ordering period will continue for 5 years thereafter (i.e., term of the contract). Also see Section I.1 entitled Ordering (FAR 52.216-18).

The performance period will continue until the time specified in the clause in Section I.1 entitled Indefinite Quantity (FAR 52.216-22).

F.3 DELIVERIES (NOV 2007)

Delivery of supplies, services, and written documents [e.g. reports, briefings, presentations, etc.] (including required formats and delivery locations) will be in accordance with the task order requirements. All correspondence and reports related to each task order shall be delivered to the CO, designated Administrative Contracting Officer (ACO) and/or Contract Specialist, and/or designated CO’s Technical Representative (COTR) as specified in the task order.

F.4 CONTRACT PROGRESS REPORT (NOV 2007)

A Contractor who has been awarded one or more task orders shall provide a monthly overall contract progress report. The contract progress report shall be provided to the CO or designee not later than the 15th of each month. The Government requires submission of reports electronically in a Microsoft Office compatible format.

The monthly progress report shall address all activity under the contract through the last day
of the previous month. The monthly contract progress report shall contain, at a minimum, the following information:

1. A listing of all new task orders accepted for the preceding month, including for each:

   a) Task order number and date of issuance;
   b) Brief description of work covered by task order, including estimated hardware/software amounts (if applicable);
   c) Amount obligated under task order;
   d) Total number of hours ordered by the Contracting Officer, if applicable; total number of hours incurred by the Contractor by labor category; and total number of hours incurred by labor category regardless of task order type;
   e) Key milestones (including date of deliverables);
   f) Subcontractor information, if applicable, including name(s), classification of subcontractor (i.e., small, disadvantaged, large, etc.), type of effort being performed, estimated amount/percentage of work to be done by subcontractor(s), and success in meeting Subcontracting Plan goals;
   g) Type of task order (i.e., FFP, CPFF, CPAF, Performance Based); and
   h) Key personnel assigned to each task order, including Prime Contractor contact point and phone number for each task order.

2. A listing of all ongoing task orders (excluding those from Paragraph 1 above), including:

   a) Task order number and date of issuance;
   b) Any modifications to the task order;
   c) Summary of dollars expended to date per task order;
   d) Estimated percentage of work yet to be completed on the task order; and
   e) Progress in meeting subcontracting goals and performance measures under the task order (if applicable).

3. A listing of all completed task orders, including:

   a) Task order number and date of issuance;
   b) Number and value of modifications issued for the task order;
   c) Completion date of task order and whether or not inspection and acceptance has been performed by Government;
   d) Total dollar amount of task order, including modifications;
   e) Success/failure in meeting subcontracting goals and performance measures under the task order (if applicable); and
   f) Status of performance evaluation comments.

4. Significant findings, problems, delays, events, and trends during the reporting period which result from or affect the performance of any task order and any perceived problems.

Any data submitted in the contract progress reports, along with other relevant information, may be included in a past performance database developed and maintained by the Government.
F.5 MONTHLY TASK ORDER PROGRESS REPORTS (NOV 2007)

A monthly progress report shall be submitted for each task order. The Volpe Center requires that the task order progress report be submitted electronically in a Microsoft Office compatible format. If a Contractor has been awarded more than one task order monthly progress reports will be submitted separately. Unless otherwise prescribed in the task order, the report will cover the following items:

1. The work performed during the previous month.

2. Significant findings, problems, delays, events, trends, etc. during the reporting period which result from or affect the performance of the task order.

3. Detailed technical description of the work planned for the next reporting period.

4. Specific action requested of the Government to assist in the resolution of a problem or to effect the timely progression of the task order.

5. An up-to-date schedule of the work performed and work to be performed under the task order. A chart shall be presented reflecting planned project accomplishments versus actual accomplishments in terms of time.

6. Report on accomplishments against any identified performance metrics if applicable.

F.6 MONTHLY TASK ORDER COST REPORTS (FEB 2011)

Monthly cost reports will be submitted by the Contractor, except for fixed-price task orders, setting forth monthly and cumulative (1) direct labor hours by categories as set forth in the task, including subcontract hours,(2) elements of cost by direct loaded dollars, funding code, subcontracts, and other direct costs, etc. that have been incurred and/or committed; (3) breakdown by funding code and summary, and (4) projected monthly spending plan table to include: obligations, monthly actual costs, cumulative actual costs, monthly projected costs, cumulative projected costs. Proprietary rate information should not be discussed. The costs that have been committed but are unpaid to date will be noted. Where cumulative amounts on the monthly reports differ from the aggregate amounts contained in the request(s) for contract financing payments covering the same period, the Contractor must provide a reconciliation of the difference as part of the monthly report. In these reports, the Contractor shall also make its current assessment of completing the remaining work within the remaining funds. The Contractor shall prepare a graph using the vertical axis for dollars and the horizontal axis for time that shows actual and projected rates of expenditures for the task order. Within thirty (30) calendar days after completion of work under the task order, the Contractor shall include in its monthly report its estimate of the total allowable cost incurred under the task order, and in the case of a cost under run, the amount by which the estimated cost of the task may be reduced to recover excess funds pending final closeout of the task order. The submission of these reports does not relieve the Contractor of its responsibility under the limitation of costs or funds clauses applicable to each task order and identified in Section I of this contract. The Volpe Center requires that the report be submitted electronically in a Microsoft Office compatible format (See Attachment J.1 - MONTHLY TASK ORDER COST REPORT FORMAT).
F.7 TECHNICAL REPORTS – TASK ORDER CONTRACTS (DEC 2003)

Task orders that identify technical reports as a deliverable will culminate in one of two types: letter type or technical. The letter type will be used primarily for smaller tasks such as data validation, field support, task planning documents, literature searches, analysis plans, conference planning documents, and schedules. A formal technical report(s) may be used for major tasks and may include earlier letter-type reports as subsections. The task order will specify the type of reports as well as the formatting and the number of copies required. The reports submitted shall be subject to review and approval by the Volpe Center COTR or Task Order COTR and, if necessary, will be modified and resubmitted. The Contractor shall submit a final report incorporating the COTR’s and/or Task Order COTR’s comments on the draft final report. The number and delivery schedule will be specified in each task order. Most final reports shall be submitted on disks and in hard copy in a format specified in the task order.

F.8 REPORTS OF WORK - REPORT DISTRIBUTION (DEC 2003)

Nothing set forth herein regarding number of copies shall be construed as authority to disregard the provisions of the clause of this contract (see Section H.2. – “GPO Printing Requirement”).

A. Contract Progress Report:

1 copy CO or designee  
1 copy COTR

B. Monthly Task Order Progress Reports:

1 copy CO or designee  
1 copy COTR  
1 copy Task Order COTR (TOCOTR)

C. Monthly Task Order Cost Reports:

1 copy CO or designee  
1 copy COTR  
1 copy TOCOTR

D. Technical Reports

The number of copies and recipients will be determined in each task order. The Contractor shall provide a copy of the cover letter transmitting final submission of technical deliverables to the CO or designee.

F.9 DOCUMENTATION OF COMPUTER PROGRAMS (MAY 1999)

The Contractor shall fully document all computer programs first produced in performance of this contract. Unless otherwise specifically agreed to by the CO in writing, the Contractor shall deliver the final codes in executable form accompanied by the source and object codes and appropriate support documentation.
F.10 RIGHTS IN DATA (DEC 2007)

All data first produced in the performance of this contract, including software, shall be delivered with unlimited Government rights, unless otherwise agreed to in writing by the CO when granting permission claim to copyright as required by FAR 52.227-14(c).

F.11 WARRANTIES (MAY 1999)

With respect to equipment or supplies acquired under this contract, title of which will pass to the Government, the Contractor shall ensure that any warranties, together with rights to replacement, service, or technical assistance, shall run to or automatically be assigned to the Government.

F.12 LICENSES (MAY 1999)

With respect to any computer software, databases, or other licensed product acquired for use by the Government, the Contractor shall ensure that the license, together with any associated rights, shall run to or automatically be assigned to the Government.

F.13 PLACE OF CONTRACT PERFORMANCE (JAN 2008)

The Government anticipates that the preponderance of work will be performed at the Contractor’s facility. Some task orders, however, require performance at a Government facility, and authorization will be provided in writing by the Contracting Officer at Task Order award.
SECTION G - CONTRACT AND ADMINISTRATION DATA

G.1 TAR 1252. 242-73 CONTRACTING OFFICER'S TECHNICAL REPRESENTATIVE (1994)

A. The CO may designate Government personnel to act as the CO's Technical Representative (COTR) to perform functions under the contract such as review and/or inspection and acceptance of supplies and services, including construction and other functions of a technical nature. The CO will provide a written notice of such designation to the Contractor within five working days after contract award or for construction, not less than five working days prior to giving the Contractor the notice to proceed. The designation letter will set forth the authorities and limitations of the COTR under the contract.

B. The CO cannot authorize the COTR or any other representative to sign documents (i.e., contracts, contract modifications, etc.) that require the signature of the CO.

G.2 RESPONSIBILITY FOR CONTRACT ADMINISTRATION (FEB 2011)

Contracting Officer: The Contracting Officer (CO) has the overall responsibility for this contract. The CO alone, without delegation, is authorized to take actions on behalf of the Government to amend, modify, or deviate from the contract terms, conditions, requirements, specifications, details and/or delivery schedules. However, the CO may delegate certain other responsibilities to his/her authorized representatives.

Administrative Contracting Officer: An Administrative CO (ACO) may be designated by the CO. The duties of an ACO include but are not limited to issuing task orders, analyzing and making recommendations on the Contractor's proposals, offers, or quotations upon request of the CO, signing task orders, and approving Contractor's invoices in accordance with the terms of the contract.

Contracting Officer's Technical Representative: A Contracting Officer's Technical Representative (COTR) will be designated by the CO. The responsibilities of the COTR include but are not limited to inspecting and monitoring the Contractor's work, determining the adequacy of performance by the Contractor in accordance with the terms and conditions of this contract, acting as the Government's representative in charge of work at the site to ensure compliance with contract requirements in so far as the work is concerned, and advising the CO of any factors which may cause delay in performance of the work. The COTR does not have the authority to make new assignments of work or to issue directions that cause an increase or decrease in the price of this contract or otherwise affect any other contract terms.

Task Order Contracting Officer's Technical Representative: The CO may designate a Task Order Contracting Officer's Technical Representative (TOCOTR). The TOCOTR will perform the duties of the COTR in connection with the technical oversight of an individual task order. The TOCOTR does not have the authority to make new assignments of work or to issue directions that cause an increase or decrease in the price of this contract or on a task order or otherwise affect any other contract or task order terms.
G.3 ORDERING (FEB 2011)

A. During the period of performance of the contract, the CO or the ACO may issue task orders in accordance with Section I.1. (FAR 52.216-18 and 52.216-22)

B. The Government will order any supplies and services to be furnished under this contract by issuing task orders on Optional Form 347 by mail, facsimile, or electronically. In addition to the CO, the following individuals are authorized ordering officers: Designated ACOs.

C. The performance period of the contract is not synonymous with the performance period of any task order issued under the contract. The period of performance for a given task order shall be specified in that task order.

D. A Standard Form 30 will be used to modify task orders.

E. A representative authorized by the Contractor shall acknowledge receipt of each task order within three (3) business days of receipt.

F. Each task order issued may incorporate the Contractor’s technical and/or cost proposals and will include an estimated cost and fixed fee or award fee or a total fixed price set forth as a ceiling price. If the task order is incrementally funded, the amount available for payment and allotted to the task will also be specified. The Limitation of Funds and/or the Limitation of Cost clauses will control notification requirements when the Contractor has reason to believe it will experience an overrun of the estimated cost or allocated funds specified in a cost reimbursable type task order.

Under no circumstances will the Contractor start work prior to the issue date of the task order unless specifically authorized to do so, in writing, by the CO or designee.

G.4 TASK ORDERS ISSUED UNDER MULTIPLE AWARD CONTRACTS (FEB 2011)

A. All Contractors shall be provided a fair opportunity to be considered pursuant to the procedures set below for each task order to be issued unless:

1. The Government’s need for the services ordered is of such unusual urgency that providing such opportunity to all Contractors would result in unacceptable delays in fulfilling that need;

2. Only one Contractor is capable of providing the services required at the level of quality required because the services ordered are unique or highly specialized;

3. The task order should be issued on a sole source basis in the interest of economy and efficiency because it is a logical follow-on to a task order already issued under this contract, provided that all awardees were given a fair opportunity to be considered for the original order;

4. It is necessary to place the order with a particular Contractor in order to satisfy a minimum order; or

5. It is necessary to limit competition to meet preference program goals identified in
FAR Part 19.

B. The Government’s objective is to keep the task order procedures simple and inexpensive for all parties to the contract. Unless the procedures in Paragraph A are used for awarding individual orders, multiple award Contractors will be provided a fair opportunity to be considered for each order using the following procedures:

1. The Government will examine existing information already in the Government's possession such as awardees’ original proposal and proposals in response to Task Order Requests for Proposal (TORFP) (labor rates, indirect rates, technical/management approaches, etc.) and current past performance report records. The Government's examination of existing information will be conducted in light of the functional and/or technical areas of the requirement and used to determine which awardees will be requested to submit a proposal for the requirement. Brief surveys may also be conducted to determine which awardees have interest and capability in a particular requirement.

2. Once the Government determines which awardees will be asked to submit a proposal for the requirement, the CO may contact Contractors to identify resource availability and price/cost for well-defined tasks. The CO may issue written requests to the Contractors requesting the submission of written and/or oral technical offers for complex tasks where a technical approach, as well as resource availability and price/cost, need to be considered.

3. A written cost proposal will be required for all task orders to be issued under this contract. The cost proposal shall include detailed cost/price information for all resources required to accomplish the task (i.e., labor hours, rates, travel, equipment, etc.). Proposals submitted for cost-type task orders will be based on average category rates or current salary rates (whichever method the Contractor customarily uses), as indicated by the Contractor’s or the subcontractor’s current payroll data, and the current provisional indirect rates, as indicated by the latest indirect rate negotiation from the cognizant auditor of the Contractor. Offerors shall provide current, up-to-date copies of the negotiated provisional indirect rates for the Contractor and any subcontractors with their offers for individual task orders unless this information has previously been provided to the CO. Offerors shall also provide an explanation of any significant difference (10 percent or more) between any labor rate proposed and the rate proposed under the base contract. Any significant difference between the ratio of administrative hours to professional hours proposed for the task order versus the ratio of administrative hours proposed to professional hours for the master contract must be explained. Any significant inconsistency between the type and amount of other direct costs (ODCs) proposed for the task and the type and ODCs proposed under the master contract must also be justified.

4. Offerors shall submit an amended Small Business Subcontracting Plan for each task order equal to or exceeding $650,000. Subcontracting information relating to the particular task order will be required. This subcontract information shall be incorporated into the amended subcontracting plan, and shall also be submitted with the Offerors task order proposal. The amended Subcontracting Plan submitted must be acceptable to the CO in order for a Contractor to be considered for award of a task.

5. Each TORFP will include the following: (a) the Statement of Work (SOW); (b) the evaluation criteria that will be used to evaluate the offers; (c) the components of the offer (technical and/or price/cost or other factors) to be submitted; (d) the format for submission;
(e) the timeframe for submission of the offer; (f) any other relevant instructions to the Contractor.

6. Upon receipt of a TORFP, the Contractor may submit an offer to the CO that must include the technical, cost, and any other information requested. The proposal must be submitted by the time specified in the request.

7. The method of evaluation and selection of an awardee for a task order will be identified in the TORFP.

8. The Government shall have the right to select the Contractor based on initial offers without discussions, but the Government reserves the right to hold discussions after evaluation of initial offers.

9. If the Government determines that certain personnel are key to successful completion of a task order, they shall be designated as Key Personnel for the task order pursuant to TAR 1252.215-70, Section I.

10. Upon request, the Government will debrief unsuccessful Offerors on a TORFP. Requests must be made within five (5) days of the notice of award for a specific task order.

G.5 TASK ORDER OMBUDSMAN (FEB 2011)

Contractors with any complaint regarding award of individual task orders shall submit such complaint(s) to the Volpe Center Competition Advocate, U.S. Department of Transportation/Research and Innovative Technology Administration/Volpe National Transportation Systems Center, 55 Broadway, Cambridge, MA 02142, Attn: David S. Ishihara; fax: (617) 494-3062; e-mail: David.Ishihara@dot.gov. It should be noted that in accordance with FAR 16.505(a)(9), no protest is authorized in connection with the issuance of a task order except for a protest on the grounds that the task order increases the scope, period of performance, or maximum value of the contract.

G.6 TECHNICAL DIRECTION (FEB 2011)

Performance of the work hereunder shall be under the technical direction of the COTR and TOCOTR on a specific task order. As used herein, "technical direction" is limited to directions to the Contractor that fill in details or otherwise complete the specific description of work set forth in the task order. This direction may not include new assignments of work, or may not be of such a nature as to cause an increase or decrease in the estimated cost of the contract or task order, or otherwise affect any other provision of this contract. The Contractor may not begin work without obligated funding and written technical direction.

G.7 ACCOUNTING AND APPROPRIATION DATA (MAY 1999)

Each individual task order shall specify the accounting and appropriation data from which payment shall be made.
G.8 PAYMENT AND CONSIDERATION (DEC 2003)

Contract clauses regarding payment processes and consideration will differ depending on the contract type/pricing methodology used in the task order. Specific clauses to be used in each case are provided below:

A. The following clause is applicable to fixed-price task orders:

CONSIDERATION - FIXED PRICE

Upon delivery and acceptance of the required services, the Contractor shall be paid at the fixed price specified on the face of the task order.

B. The following clauses are applicable to Cost-Plus-Fixed-Fee task orders:

CONSIDERATION - COST-PLUS-FIXED-FEE

(1) Subject to the clauses Limitation of Cost (FAR 52.232-20), Allowable Cost and Payment (FAR 52.216-7), and Fixed Fee (52.216-8), the total allowable cost of this task shall not exceed $(TO BE COMPLETED AT TIME OF AWARD OF TASK), which is the total estimated cost of the Contractor's performance hereunder exclusive of fixed fee. In addition, the Government shall pay the Contractor a fixed fee of $(TO BE COMPLETED AT TIME OF AWARD OF TASK) for the performance of this task.

(2) The Contractor shall be provisionally reimbursed indirect expenses on the basis of billing rates approved by the Cognizant Federal Agency (CFA) pending establishment of final indirect rates.

(3) The final indirect expense rate pertaining to the contract shall be those determined for the appropriate fiscal year in accordance with FAR 42.705 and FAR 52.216-7.

C. The following clauses are applicable to Cost-Plus-Award-Fee task orders:

CONSIDERATION - COST-PLUS-AWARD-FEE

(1) Subject to the clauses Limitation of Cost (FAR 52.232-20) and Allowable Cost and Payment (FAR 52.216-7), the total allowable cost of this task shall not exceed $(TO BE COMPLETED AT TIME OF AWARD OF TASK), which is the total estimated cost of the Contractor's performance hereunder exclusive of base fee. In addition, the Government shall pay the Contractor a base fee of $(TO BE COMPLETED AT TIME OF AWARD OF TASK) for the performance of this task.

(2) The Contractor shall be provisionally reimbursed indirect expenses on the basis of billing rates approved by the Cognizant Federal Agency (CFA) pending establishment of final indirect rates.

(3) The final indirect expense rate pertaining to the contract shall be those determined for the appropriate fiscal year in accordance with FAR 42.705 and FAR 52.216-7.

(4) The award fee provided for in this task order is $(TO BE COMPLETED AT TIME OF AWARD OF TASK) and is subject to the terms of the "Determination of Award Fee"
AND “Distribution of Award Fee” clauses (see Section I). The estimated cost, base fee, and available award fee are as follows:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Estimated Cost</td>
<td>$ (TO BE COMPLETED)</td>
</tr>
<tr>
<td>Base Fee</td>
<td>$0</td>
</tr>
<tr>
<td>Available Award Fee</td>
<td>$ (TO BE COMPLETED)</td>
</tr>
<tr>
<td>Maximum Available CPAF</td>
<td>$ (TO BE COMPLETED)</td>
</tr>
</tbody>
</table>

(5) The amount of the award fee shall be based on a subjective evaluation by the Government of the quality of the Contractor's performance judged in light of the nature of the work involved and any other factors that are considered relevant to the determination in accordance with the “Performance Plan” clause (see Section I). This evaluation will be based on the past performance evaluation conducted on all tasks using the Contractor Performance Report (see Attachment J.2.). The following criteria apply to each of the five performance ratings below; the figures in parentheses represent the percentage of the award fee to be paid for the equivalent ratings.

(a) EXCEPTIONAL PERFORMANCE (100 Percent)

The Contractor's contribution in the performance of the task is absolutely essential to the overall effort and far exceeds the contribution normally expected. Most importantly, within the scope and cost of the task order, the work is performed so expertly and thoroughly that a new dimension is added to the original requirement. Resulting deliverables are always provided on time or ahead of schedule, on or under cost estimates, and are of such superior technical quality that additional effort is not required. Substantial expert and innovative effort and interaction is provided. Overall cost and personnel management is handled in a totally proficient and effective manner so as to maximize both the Government's return on investment and the Contractor's own technical capabilities. Subcontracting goals are met and exceeded in all categories. The Contractor displays quality management, including identification of and statistical process control for critical processes and subcontractor involvement in continuous process improvement.

(b) GOOD PERFORMANCE (85 Percent)

The Contractor's contribution in the performance of the task is a great asset to the overall effort and often exceeds the contribution normally expected. Within the scope and cost of the task order, work is performed with great technical skill and meets or occasionally exceeds the requirements of the task. The resulting deliverables are always of high quality, provided on or occasionally ahead of schedule, and within cost estimates. Substantial innovative thought and interaction between tasks is often evident. Subcontracting goals are met in all categories and exceeded in some of those categories.

(c) SATISFACTORY PERFORMANCE (70 Percent)

The Contractor's contribution in the performance of the task is a solid asset to the overall effort and is commensurate with the amount of contribution expected. Work is performed in a professional and thorough manner, and deliverables meet all contract requirements. Some deliverables may be delivered ahead of schedule while others may experience slight delays; however, overall, the contract schedule is met. Some creativity and innovative thought is demonstrated in the delivery of work. Cost and personnel performance are fully acceptable and any deviations are within what would be expected of an effective and professional
execution of a technical support effort. Subcontracting goals are met in all categories.

(d) MINIMALLY ACCEPTABLE PERFORMANCE (40 Percent)

The Contractor's contribution in the performance of the task, although evident in the execution of the overall effort, is below that contribution normally expected for such an effort. Work is completed; however, additional Government assistance and direction is required to ensure completion. The resulting deliverables are often provided on schedule; however, some delays are experienced, and deliverables occasionally require correction or resubmission prior to acceptance. Some cost deviations of significant proportions may have occurred in conjunction with the re-submissions and delays. Subcontracting goals are not met. Overall, management of technical effort and personnel is less than what would be expected of a completely satisfactory effort.

(e) UNSATISFACTORY (0 Percent)

Performance failed to satisfy the minimum contract or task requirements, technical or otherwise.

G.9 PAYMENTS UNDER COST REIMBURSEMENT CONTRACTS (FEB 2011)

NOTE: Under no circumstances can funds obligated under one task be used to pay costs incurred or fee earned under another task.

The invoicing and payment office for all contract actions issued by the DOT/RITA/Volpe National Transportation Systems Center is located at the Enterprise Services Center (ESC), Office of Financial Operations, Federal Aviation Administration (FAA) in Oklahoma City, Oklahoma.

The Contractor must submit separate cost and fee invoices. All invoices, including supporting documentation, shall be submitted electronically (e.g., PDF format) to the ESC at FAA in Oklahoma City by e-mail at the following address: volpeinvoices@faa.gov (all lower case). A cover email must accompany each invoice and provide the applicable information in the fields listed below.

Invoice Date:
Supplier Name:
Invoice Amount:
Invoice Number:
Contract No. /Purchase Order No.:
Task:
Modification No.:
Terms/Discount:
Performance Period:
Notes:

However, all interim payment requests for tasks under the contract must be submitted concurrently. The Contractor shall submit a last interim invoice for each task order. This shall include a complete list of invoices previously tendered under the task order. The last interim invoice shall consist of the completion invoice (clearly identified in accordance with
FAR 52.216-7 prior to the establishment of final annual indirect rates. The last interim invoice shall be submitted within six (6) months of the task order’s physical completion. If changes to this invoice become necessary as a result of Government review, the Contractor shall submit a corrected last interim invoice. The Contractor shall submit this invoice, along with the Contractor’s release form, DOT F 4220.4, to the Contracting Officer, following the final adjustment of its annual indirect rates per FAR 52.216-7.

In addition to the information required by FAR 52.216-7 and FAR 52.232-25 incorporated by reference in Section I, an invoice or contract financing payment request must meet the following requirements:

(1) Consecutively number each interim payment request beginning with No. 1 for each task.

(1a) The Contractor must specify the appropriate cost per funding source(s) in which ESC should make payment on the SF 1034. If this information cannot be entered on the SF 1034 the Contractor must clearly state where the information can be found in the voucher package on the SF 1034. The same procedures shall be followed for fee invoices. In addition, the Contractor must indicate if the voucher is a cost voucher or a fee voucher on the SF 1034. Cost and Fee vouchers must continue to be billed separately and must be clearly marked in the title so ESC at FAA may make distinction.

(2) The voucher shall include current and cumulative charges by major cost elements such as direct labor, overhead, subcontracts, and other direct costs. Cite direct labor hours incurred by the Prime Contractor and each subcontractor. Other direct costs must be identified, e.g., travel, per diem, material, and equipment.

(3) Requests for contract financing or invoices must clearly indicate the period of performance for which payment is requested and the Volpe Center accounting information necessary to process payments. When contracts or task orders contain multiple lines of accounting data, charges that cannot be assigned to a single line of accounting information should be allocated based on the percentage of total dollars unless otherwise specified.

(4) When the Contractor submits vouchers on a monthly basis, the period covered by invoices or requests for contract financing payments must be the same as the period for monthly progress reports reported under the contract or tasks. If, in accordance with FAR 52.216-7, the Contractor submits requests for invoices or contract financing payments more frequently than monthly, one payment request per month must have the same ending date as the monthly progress report.

(5) Pending settlement of the final indirect rates for any period, the Contractor shall be reimbursed at billing rates approved by the Cognizant Federal Agency (CFA). The Contractor shall ensure that any change in the identity of the CFA responsible for establishment of its indirect rate factors is made known to the Volpe Center ACO. These rates are subject to appropriate adjustments when revised by mutual agreement or when the final indirect rates are settled either by mutual agreement or unilateral determination by the CFA (see FAR 42.704). In accordance with FAR 52.216-7, the Contractor shall submit to the CFA a proposal for final indirect rates based on the Contractor’s actual costs for the period, together with all supporting data. In addition, Contractors are required by the CFA to submit billing rate proposals, usually no later than thirty (30) days
after the close of its fiscal year for the ensuing fiscal year to the CFA. Copies of the
cover letter submitting the proposal must be provided to the Volpe Center ACO. The
Contractor’s failure to provide the rate proposal in a timely manner may impact payment
of financing request and could ultimately result in suspension of the indirect expense
portion. The Contractor shall provide copies of all rates established by the CFA to the
Volpe Center ACO. It is imperative that the ACO be provided signed copies of all rate
agreements since these rate agreements must be in the possession of the Volpe Center
before any rates contained therein can be used by the Contractor for cost reimbursement.
The Contractor should note that absence of a final rates determination does not relieve the
Contractor of its responsibility under the Limitation of Funds or Limitation of Costs
clauses to report in a timely manner to the CO when it has reason to believe its costs may
exceed the total estimated cost or funds allotted to the task order.

G.10 PAYMENT OF FEE - COST-PLUS-FIXED-FEE (FEB 2011)

The Government will issue task orders which will include one of two methods by which the
Contractor can earn total fixed fee. Requests for provisional fee payment must be based on
and be consistent with the information stated in the contract or task financing request.
However, the request must be submitted separately.

For term-type task orders, a portion of any fixed fee specified in the task order will be paid
on a provisional basis. The amount of such payments will be based upon a percentage of
costs expended during performance of the task order. Final amount may be determined at
contract closeout as Contractor maintains the right to invoice for costs expended on
completed task orders up until that time.

In accordance with FAR 52.216-8, the Government will withhold 15% of the earned fixed fee
per invoice, per task order, until $100,000 is withheld on that particular task order. At that
time, full payment of fee may invoiced through remainder of task order performance period.
On Task Orders in excess of $10,000,000 the CO reserves the right to withhold amount
determined sufficient. The withheld funds may be invoiced during closeout of the Master
Contract.

On a completion-type task order, if performance is considered satisfactory, the Government
may make provisional fee payments subject to FAR 52.216-8 on the basis of percentage of
work completed, as determined by the CO. The Contractor shall be required to complete the
specified end product (e.g., a final report or working system) within the estimated cost as a
condition for payment of the entire fixed fee. In the event the work cannot be completed
within the estimated cost, the Government may require more effort without any increase in
fee, provided the Government increases the estimated cost. If the Government chooses not to
increase the estimated cost, the fixed fee payable will based on the CO’s determination of the
percentage of completion of the specified end product(s).

Provisional payment of fee will be subject to other relevant clauses of the contract including
retainage.

G.11 PERFORMANCE EVALUATIONS (FEB 2011)

Performance evaluations shall be completed for each completed task order over $100,000 and
for selected tasks for lower amounts as determined by the CO. Performance evaluations shall
also be completed at least annually for task orders that have a performance period in excess of one year. The Government uses the Contractor Performance Assessment Review System (CPARS) as the primary method to complete evaluations. Completed performance evaluations may be accessed in the Past Performance Information Retrieval System (PPIRS).

The Contractor is required to register in CPARS and shall have thirty (30) calendar days in which to respond to Government comments. The Government will consider any comments provided by the Contractor before finalizing a Performance Evaluation Report and the Contractor’s comments will be attached to the Report.

G.12 VOUCHER REVIEW (MAR 2003)

The Government may at its sole discretion utilize a Contractor to review vouchers and supporting data submitted for payment under the provisions of this contract. The Contractor reviewing vouchers and supporting data will perform this function in accordance with contract provisions which prohibit disclosure of proprietary financial data or use of such data for any purpose other than to perform accounts payable services.

G.13 COST ACCOUNTING SYSTEMS (FEB 2011)

Cost Accounting System

The Contractor shall maintain a job order cost accounting system that will accumulate costs incurred for each task order separately. The Contractor shall invoice the Government only in accordance with its approved accounting system.

Administrative Labor

Only those labor categories and functions identified and priced out in the Cost and Business Proposal are billable as direct labor during performance without prior Contracting Officer approval. This also applies to subcontractors. The Administrative Labor categories included in the Contractors Cost and Business Proposal are hereby incorporated into the contract.

Other Direct Costs

In addition to travel and equipment costs estimated by the Government in Schedule 2, only those costs identified and priced out in the proposal by the Offeror (or subcontractor) are billable without prior Contracting Officer approval. Elements of other direct cost identified in the Contractor’s Cost and Business Proposal are hereby incorporated into the contract.

Task Order Proposal Preparation Cost

Submission of proposals in response to task order RFPs is not mandatory. Bid and proposal expenses incurred in connection with the preparation of task order proposals will be reimbursed in accordance with established practices; however, bid and proposal costs will not be reimbursed as direct costs.

Uncompensated Overtime

(The term “contract proposals” as used in this clause refers to proposals which may result in
initial contract award. "Task order proposals" refers to proposals received in response to task order RFPs.)

Uncompensated overtime is defined as hours worked by Fair Labor Standards Act exempt employees in excess of 40 hours per week for which no compensation is paid in excess of normal weekly salary. A Contractor/subcontractor may include uncompensated overtime in its cost proposal only if the practice is consistent with its established accounting practices.

The Contractor/subcontractor's accounting system must record all direct and indirect hours worked, including uncompensated overtime.

Only those Contractors/subcontractors who included uncompensated effort in their contract proposals may use this accounting practice in a task order proposal or during performance. Similarly, task order proposals must include uncompensated effort consistent with contract cost proposals. Task order proposals which deviate from contract proposals must include an explanation for the deviation for the CO's consideration.

The following clause will be included in each task order when the awardee or subcontractors included uncompensated overtime in their task order proposals:

This task order is based upon the Contractor's task order proposal dated TBD in which, of the total TBD hours required, TBD hours are estimated to be uncompensated as shown below.

<table>
<thead>
<tr>
<th>Prime Contractor Workweek</th>
</tr>
</thead>
<tbody>
<tr>
<td>Task Order</td>
</tr>
<tr>
<td>Labor Category</td>
</tr>
<tr>
<td></td>
</tr>
</tbody>

<table>
<thead>
<tr>
<th>Subcontractor Workweek</th>
</tr>
</thead>
<tbody>
<tr>
<td>Task Order</td>
</tr>
<tr>
<td>Labor Category</td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>

During performance, the Contractor must provide compensated and uncompensated hours in at least the same ratio as shown in the above schedule by labor category. If the Contractor anticipates that the ratio will not be achieved by the completion of the task order, the Contractor shall notify the CO in writing, identifying the expected shortfall. The Contractor must offer to furnish the total level-of-effort included in the task order at no additional cost or fee. The notice
shall be provided sufficiently in advance of the completion of the task order to allow the performance of all such hours within the task order term and within the total estimated cost and fixed fee for the task order. If the Contractor fails to provide such notice sufficiently in advance, the CO at his/her sole discretion shall have the option of:

(1) Extending the term of the task order and requiring that the Contractor provide the total level-of-effort at no extra cost to the Government, or

(2) Reducing the cost to be reimbursed by an amount calculated by multiplying the number of hours of unworked, uncompensated overtime by the average burdened labor rate for those labor categories and reducing the fixed-fee proportionately. The Contractor shall indicate on its invoices and on any contract data items for cost/schedule status all hours worked, both compensated and uncompensated.

G.14 INCREMENTAL FUNDING OF TASK ORDERS (DEC 2003)

Pursuant to FAR 52.232-22, Limitation of Funds (APR 1984), incorporated by reference herein, task orders issued under this contract may be incrementally funded.

A. When a term-type task order is incrementally funded, the following clause will be set forth in full in the task order modification:

LIMITATION OF LIABILITY - INCREMENTAL FUNDING (TERM FORM)

(1) The amount available for payment for this incrementally funded task order is hereby increased from $__TBD__ by $__TBD__ to $__TBD__. The amount allotted to the estimated cost is increased from $__TBD__ by $__TBD__ to $__TBD__. The amount obligated for the fixed fee/award fee is increased from $__TBD__ to $__TBD__. This modification involves no change in the total level-of-effort, estimated costs or fixed fee/award fee of this contract, unless otherwise specified herein. The Limitation of Funds clause, FAR 52.232-22, applies to the amount allotted to cover the estimated costs only. The fixed-fee will be payable in accordance with other clauses of the contract.

(2) The estimated level-of-effort applicable to the incremental funding provided herein is_______ professional labor-hours.

(3) The incremental funding provided herein is estimated to be adequate for services performed through ________.

(4) The funding must be tracked and billed accordingly. The funds obligated in block 12 of the SF 30 are available only for work performed on or after the effective date of this modification.

B. When a completion-type task order is incrementally funded, the following clause will be set forth in full in the task order modification:

LIMITATION OF LIABILITY - INCREMENTAL FUNDING (COMPLETION FORM)

(1) The amount available for payment for this incrementally funded task order is hereby
increased from $TBD by $TBD to $TBD. The amount allotted to the estimated cost is increased from $TBD by $TBD to $TBD. The amount obligated for the fixed fee/award fee is increased from $TBD to $TBD. This modification involves no change in the total level-of-effort, estimated costs or fixed fee/award fee of this contract, unless otherwise specified herein. The Limitation of Funds clause, FAR 52.232-22, applies to the amount allotted to cover the estimated costs only. The fixed-fee will be payable in accordance with other clauses of the contract.

(2) The incremental funding provided herein is applicable to the tasks and deliverables specified in TBD.

(3) The funding must be tracked and billed accordingly. The funds obligated in block 12 of the SF 30 are available only for work performed on or after the effective date of this modification.

G.15 TRAVEL AND PER DIEM (FEB 2011)

All travel performed under this contract shall be performed in accordance with Federal Travel Regulations (FTR) and must be approved in writing in advance of travel taking place. The actual costs for lodging, meals, and incidentals will be considered reasonable and allowable if they do not exceed the maximum per diem rates in effect at the time of travel as set forth in the FTR. In accordance with FAR Subpart 31.205-46, a written justification must be provided for higher amounts in special or unusual circumstances. Under cost-type task orders, travel will be reimbursed at actual costs (with a copy of the receipts for expenses) in the following categories:

1.) Airline Tickets (commercial rate economy seating).
2.) Hotel Expenses (Government rates unless concurred in advance by the COTR/TOCOTR).
3.) All Other Modes of Transportation (Taxi receipts are not required if less than $75.00).

Under cost-type task orders, food and other miscellaneous expenses will be reimbursed at the prevailing FTR reimbursement rates. The COTR/TOCOTR reserves the right to modify procedures on a Task Order level if there are extensive travel requirements.

G.16 SUBCONTRACTING REPORT (JULY 2000)

Pursuant to FAR 52.219-14, Limitation on Subcontracting, small businesses receiving task orders as a result of a task order set aside (or directed task order) may not subcontract greater than 50 percent of contract performance incurred for personnel under this contract on a cumulative basis (i.e., although individual task orders may have greater than 50 percent subcontracting, the total cumulative subcontracting under all task orders may not exceed 50 percent). Small businesses shall submit an annual report to the Contracting Officer on October 31 of each year, detailing the subcontracting percentage under these task orders performed during the previous Government fiscal year. The report shall show the subcontracting percentage for the year under each individual task order, the cumulative total for the reporting period under the contract, and the cumulative total for the life of the contract. The Government reserves the right to limit awards at any time to a small business not in compliance with this FAR clause.
G.17 ALLOTMENT (FEB 2011)

Pursuant to Clauses B.2 – “Contract Limitations,” and FAR 52.216-22 – “Indefinite Quantity,” the amount presently available for payment and allotted to this contract to provide for the contract minimum is $2,500. This allotted amount will be applied, as appropriate, to one or more individual task orders issued under this contract. Additional funding will be allotted and obligated as necessary, only on individual task orders.

The accounting and appropriation amount currently allotted is as follows:

<table>
<thead>
<tr>
<th>PR Number</th>
<th>Accounting Code</th>
<th>Amount Obligated</th>
</tr>
</thead>
<tbody>
<tr>
<td>DTRT-RVT-71-1158</td>
<td>51YK859 G257B</td>
<td>$2,500</td>
</tr>
</tbody>
</table>
SECTION H - SPECIAL CONTRACT REQUIREMENTS

H.1 NON-PERSONAL SERVICES (DEC 1998)

No personal services as defined in Part 37 of the FAR shall be performed under this contract. No Contractor employee will be directly supervised by the Government. All individual employee assignments and daily work direction shall be given by the Contractor’s supervisor. If the Contractor believes any Government action or communication has been given that would create a personal services relationship between the Government and any Contractor employee, the Contractor shall promptly notify the Contracting Officer of this communication or action.

The Contractor shall not perform any inherently Governmental functions under this contract. No Contractor employee shall hold him or herself out to be a Government employee, agent, or representative. In all communications with third parties in connection with this contract, Contractor employees shall identify themselves as Contractor employees and specify the name of the company for which they work. In all communications with other Government Contractors in connection with this contract, the Contractor employee shall state that they have no authority to in any way change the contract and that if the other Contractor believes this communication to be a direction to change their contract, they should notify the Contracting Officer for that contract and not carry out the direction until a clarification has been issued by the Contracting Officer.

The Contractor shall ensure that all of its employees working on this contract are informed of the substance of this clause. Nothing in this clause shall limit the Government's rights in any way under any other provision of the contract, including those related to the Government's right to inspect and accept the services to be performed under this contract. The substance of this clause shall be included in all subcontracts at any tier.

H.2 GPO PRINTING REQUIREMENT (DEC 1998)

All printing funded by this contract will be accomplished in conformance with Title 44, United States Code, regulations of Joint Committee on Printing, applicable provisions of appropriation acts, and applicable regulations issued by the Government Printing Office and the Department of Transportation.

H.3 CONTRACTOR RESPONSIBILITY (DEC 1998)

The Contractor shall without additional expense to the Government, be responsible for all damage to persons or property that occur as a result of its fault or negligence in connection with the prosecution of the work, and shall be responsible for the proper care and protection of the work performed. Breakage or loss of office equipment or other property including that of a Government employee, which may occur in or about the building as a result of a fault or negligence in the Contractor’s operations or fault or negligence in the actions of the Contractor’s agent, subcontractors or its employees shall be made good by the Contractor at its own expense.

H.4 SALES TAX EXEMPTION (MAY 1999)

The Volpe National Transportation Systems Center, as part of the Department of Transportation, an agency of the United States, is an exempt purchaser. Accordingly, all
purchases of personal property by this organization are exempt from state and local taxation.

The Contractor will be provided with tax exemption certificates for the purpose of obtaining an exemption under this procurement for materials and equipment purchased under this procurement (see each individual task order). Notwithstanding the terms of the Federal, State, and Local Taxes clause, the Contractor shall state separately on its vouchers the amount of state sales tax, and the Government agrees to either pay the amount of the tax to the Contractor or, where the amount of the tax exceeds $250.00, to provide evidence necessary to sustain the exemption.

H.5 LEVEL-OF-EFFORT NOTIFICATION (FEB 2011)

The Contractor shall notify the CO or designee immediately in writing whenever it has reason to believe that:

(1) The level-of-effort that the Contractor expects to incur under any term-type task in the next thirty days, when added to the level-of-effort previously expended in the performance of that task order, will exceed 75 percent of the level obligated for that task order;

(2) If obligations are from multiple funding sources, notification is required to be fund source specific in addition to the overall task order.

(3) The level-of-effort required to perform a particular task order will be greater than the level-of-effort established for the task order.

Either the "Limitation of Cost" or the "Limitation of Funds" clause, depending on whether the task order is fully funded or not, applies independently to each task order under this contract and nothing in this clause amends the rights or responsibilities of the parties hereto under either of these two clauses. The notifications required by this clause are separate and distinct from any specified in the "Limitation of Cost" or "Limitation of Funds" clause.

H.6 HANDLING OF DATA (MAY 2007)

The Contractor and any of its subcontractors in performance of this contract may have need for access to and use of various types of data and information in the possession of the Government which the Government obtained under conditions that restrict the Government's right to use and disclose the data and information, or which may be of such a nature that its dissemination or use other than in the performance of this contract would be adverse to the interests of the Government or other parties. Therefore, the Contractor and its subcontractors agree to abide by any restrictive use conditions on such data and not to:

(1) Knowingly disclose such data and information to others without written authorization from the CO, unless the Government has made the data and information available to the public; nor

(2) Use for any purpose other than the performance of this contract that data which bears a restrictive marking or legend.

In the event the work required to be performed under this contract requires access to proprietary data of other companies, the Contractor shall obtain agreements from such other companies for such use unless such data is provided or made available to the Contractor by
the Government. Two copies of such company-to-company agreements shall be furnished promptly to the CO for information only. These agreements shall prescribe the scope of authorized use or disclosure, and other terms and conditions to be agreed upon between the parties. It is agreed by the Contractor that any such data, whether obtained by the Contractor pursuant to the aforesaid agreement or from the Government, shall be protected from unauthorized use or disclosure to any individual, corporation, or organization so long as it remains proprietary.

Through formal training in company policy and procedures, the Contractor agrees to make employees aware of the absolute necessity to maintain the confidentiality of data and information, as required above, and, further, to be made aware of the sanctions which may be imposed for divulging either the proprietary data of other companies or data that is obtained from the Government to anyone except as authorized. The Contractor shall obtain from each employee engaged in any effort connected with this contract an agreement in writing that shall in substance provide that such employee will not during his/her employment by the Contractor, or thereafter, disclose to others or use for his/her own benefit or the future benefit of any individual any trade secrets, confidential information, or proprietary/restricted data (to include Government "For Official Use Only") received in connection with the work under this contract. The Contractor shall furnish a sample form of this agreement to the CO promptly after award.

The Contractor agrees to hold the Government harmless and indemnify the Government against any cost/loss resulting from the unauthorized use of disclosure of third party data or software by the Contractor, its employees, subcontractors, or agents.

The Contractor agrees to include the substance of this provision in all subcontracts awarded under this contract. The CO will consider case-by-case exceptions from this requirement for individual subcontracts in the event that:

(1) The Contractor considers the application of the prohibitions of this provision to be inappropriate and unnecessary in the case of a particular subcontractor;

(2) The subcontractor provides a written statement affirming absolute unwillingness to perform absent some relief from the substance of this prohibition;

(3) Use of an alternate subcontract source would reasonably detract from the quality of effort; and

(4) The Contractor provides the CO timely written advance notice of these and any other extenuating circumstances.

If the CO denies the exception, the Contractor and its subcontractors shall not have access to the data and information for which the Contractor and any of its subcontractors took exception, unless the Contractor agrees to include the substance of this provision in all subcontracts awarded under this contract. If the CO approves an exception, the CO shall provide the approval and its specific parameters (including duration), in writing, to the Contractor before the Contractor or any of its subcontractor is granted access to the restricted data (including, but limited to, any trade secrets, confidential information, or proprietary/restricted data as well as Government "For Official Use Only" for use in connection with the work under this contract).
The Contractor and its subcontractors agree to abide by all data and information markings. When transferring or sharing such data for work under this contract, before such transfer or sharing, the Contractor and its subcontractors shall ensure the markings are included or remain on the data and information as the markings were received from the Government or another company.

Except as the CO specifically authorizes in writing, upon completion of all work under this contract, the Contractor shall return all such data and information obtained from the Government, including all copies, modifications, adaptations, or combinations thereof, to the CO. Data obtained from another company shall be disposed of in accordance with the Contractor's agreement with that company, or, if the agreement makes no provision for disposition, shall be returned to that company. The Contractor shall further certify in writing to the CO that all copies, modifications, adaptations, or combinations of such data or information which cannot reasonably be returned to the CO (or to a company) be deleted from the Contractor's (and any subcontractor's) records and destroyed.

These restrictions do not limit the Contractor's (or subcontractor’s) right to use and disclose any data and information obtained from another source without restriction.

As used herein, the term "data" generally has the meaning set forth in Federal Acquisition Regulations (FAR), Clause 52.227-14, "Rights in Data - General" (JUN 1987), Alternate I, II, III (JUN 1987), and includes, but is not limited to, computer software, as also defined in FAR Clause 52.227-14. In regards to other companies' information that the Government may receive with restrictions or pursuant to a Non-disclosure agreement, “data” may also mean any information pertaining to that company without limitation, and including “information incidental to contract administration, such as financial, administrative, cost or pricing, or management information,” regardless of the form or the media on which the information may be recorded or in which the information may be transmitted to the Government.

**H.7 TECHNOLOGY UPGRADES/REFRESHMENTS (DEC 1998)**

After issuance of a task order, the Government may solicit, and the Contractor is encouraged to propose independently, technology improvements to the hardware, software, specifications, or other requirements of the task order. These improvements may be proposed to save money, to improve performance, to save energy, to satisfy increased data processing requirements, or for any other purpose which presents a technological advantage to the Government. As part of the proposed changes, the Contractor shall submit a price or cost proposal to the CO for evaluation. Those proposed technology improvements that are acceptable to the Government will be processed as modifications to the task order. As a minimum, the following information shall be submitted by the Contractor with each proposal:

1. A description of the difference between the existing contract requirement and the proposed change, and the comparative advantages and disadvantages of each;

2. Itemized requirements of the task order which must be changed if the proposal is adopted, and the proposed revision to the contract for each such change;

3. An estimate of the changes in performance and price or cost, if any, that will result from adoption of the proposal;

4. An evaluation of the effects the proposed changes would have on collateral costs to the
Government, such as Government-furnished property costs, costs of related items, and costs of maintenance, operation and conversion (including Government application software);

(5) A statement of the time by which the task order modification adopting the proposal must be issued so as to obtain the maximum benefits of the changes during the remainder of the task order including supporting rationale; and

(6) Any effect on the task order completion time or delivery schedule shall be identified.

The Government will not be liable for proposal preparation costs or any delay in acting upon any proposal submitted pursuant to this clause. The Contractor has a right to withdraw, in whole or in part, any proposal not accepted by the Government within the period specified in the proposal. The decision of the CO as to the acceptance of any such proposal under this contract is final and not subject to the "Disputes" clause of this contract.

If the Government wishes to test and evaluate any item(s) proposed, the CO will issue written directions to the Contractor specifying what item(s) will be tested, where and when the item(s) will be tested, to whom the item(s) is to be delivered, and the number of days (not to exceed 90 calendar days) that the item will be tested.

The CO may accept any proposal submitted pursuant to this clause by giving the Contractor written notice thereof. This written notice will be given by issuance of a modification to the task order. Unless and until a modification is executed to incorporate a proposal under this contract, the Contractor shall remain obligated to perform in accordance with the requirements, terms and conditions of the existing task order.

If a proposal submitted pursuant to this clause is accepted and applied to this contract, the equitable adjustment increasing or decreasing the price, Cost-Plus-Fixed-Fee, or Cost-Plus-Award-Fee shall be in accordance with the procedures of the applicable "Changes" clause. The resulting task order modification will state that it is made pursuant to this clause.

H.8 INSURANCE (MAR 2003)

See Section I - Contract Clause FAR 52.228-7, "Insurance-Liability to Third Persons (MAR 1996)."

The Contractor shall secure, pay the premiums for and keep in force until the expiration of this contract, and any renewal thereof, adequate insurance as provided below, such insurance to specifically include liability assumed by the Contractor under this contract.

(1) Workman's compensation insurance as required by law of the State.

(2) Comprehensive bodily injury liability insurance with limits of not less than $500,000 for each accident.

(3) Property damage liability with a limit of not less than $100,000 for each accident.

(4) Automotive bodily injury liability insurance with limits of not less than $200,000 for each person and $500,000 for each accident, and property damage liability insurance, with a limit of not less than $40,000 for each accident.

Each policy of insurance shall contain an endorsement that any cancellation or material change
in the coverage adversely affecting the Government's interest shall not be effective unless the insurer or the Contractor gives written notice of cancellation or change to the CO at least thirty (30) calendar days prior to the aforementioned actions. When the coverage is provided by self-insurance, the Contractor shall not change or decrease the coverage without the CO's prior approval.

A certificate of each policy of insurance shall be furnished to the CO within ten (10) days after notice of award certifying, among other things, that the policy contains the aforesaid endorsement. The insurance companies providing the above insurance shall be satisfactory to the Government. Notices of policy changes shall be furnished to the CO.

**H.9 MAXIMUM FEE/PROFIT (FEB 2011)**

Contractors shall propose an appropriate rate of fixed fee depending on the risk associated with a **cost-plus-fixed-fee** contractual arrangement and the nature of the work in the task order. However, the proposed task order fixed fee cannot exceed an amount that is the sum of (1) ___10_ percent of the subcontracts, equipment, travel costs, Offeror-estimated ODCs, and RFP-stipulated ODCs, and (2) ___10_ percent of all other costs. In accordance with Paragraph, G.10, Payment of Fee – Cost-Plus Fixed Fee, fee will be determined as a percentage of costs expended. 

Contractors shall propose an appropriate rate of available award fee depending on the risk associated with a **cost-plus-award-fee** contractual arrangement and the nature of the work in the task order. In accordance with Paragraph G.8, Payment and Consideration, the base fee shall be 0 percent. The proposed award fee available under the task order cannot exceed an amount that is the sum of (1) ___12_ percent of the subcontracts, equipment, travel costs, Offeror-estimated ODCs, and RFP-stipulated ODCs, and (2) ___12_ percent of all other costs.

For task orders issued on **firm-fixed-price** basis, Contractors shall propose an appropriate profit based on the risk associated with that contract type and the nature of the work in the task order. The proposed profit included in the firm-fixed-price cannot exceed an amount that is the sum of (1) ___12_ percent of the subcontracts, equipment, travel costs, Offeror-estimated ODCs, and RFP-stipulated ODCs, and (2) ___12_ percent of all other costs.

**H.10 SUBCONTRACT APPROVAL (NOV 2011)**

The Contractor's Subcontracting Plan dated **July 14, 2011** in support of this contract is hereby approved and incorporated herein. Since this is an indefinite delivery/indefinite quantity (IDIQ) contract, most subcontracts for professional labor shall also be placed on an IDIQ basis. Only first-tier subcontractors are allowed unless the Contractor can provide a strong technical rationale for inclusion of a second-tier subcontract and demonstrate what steps have been taken to prevent layering of costs and profit.

The Contractor shall follow the procedures specified in Part 44 of the FAR and FAR Clauses 52-244-2, and 52.244-5 when providing advance notification or requesting consent to new subcontracts. New subcontracts may be necessary for professional labor in cases where it is clearly evident to the CO that the proposed new subcontract will provide a capability that is both required to perform work described in the contract and is not available from any of the Contractor's existing team of subcontractors. If a subcontractor’s accounting system has been approved by a cognizant audit agency, usually the Defense Contract Audit Agency (DCAA),
the subcontractor’s proposal **must** be submitted as a Cost-Plus-Fixed-Fee type subcontract.

In order to add a new subcontractor the Contractor must submit a written technical rationale describing the need for the new subcontractor to the CO for approval. Upon approval, a cost proposal including contract type with detailed cost information must be submitted for CO approval. The approved subcontract value shall be the subcontract ceiling on the Master Contract level. Prior to using a subcontractor the Contractor must propose the subcontractor on a specific task order and identify a cost ceiling for approval. This task order proposal requires a separate cost proposal. The Contractor is required to monitor this cost and shall not exceed the approved cost ceilings on a Master contract level for each subcontractor.

During Task Order solicitations Contractors shall obtain approval of all new subcontractors prior to submission of its task order proposal. In such cases, task order proposals must include at least 75 percent (labor hours) of the Contractor’s current team (the Prime and previously authorized subcontracts). The remaining 25 percent may include new subcontracts which have not been previously consented to. Task order proposals failing to comply with this minimum will be rejected.

**H.11 SECURITY AND POSITION SENSITIVITY DESIGNATIONS (FEB 2011)**

Portions of the work under Section C may require contract personnel with security clearances at Confidential or Secret levels, and in some instances, Top Secret. Cleared personnel, if required, must be available at the transition of the contract or task order. Some task orders may require access to classified information. The requirement for a Secret or Top Secret Facility clearance for individual task orders will be determined at the time a task order is issued and whether or not the clearance will apply to the prime and/or any of its subcontractors.

If a Top Secret Facilities Clearance is required, the Contractor shall follow procedures in accordance with the Industrial Security Regulation (DOD 5220.22R) for the receipt, generation, and storage of classified material. The Contractor shall be responsible for obtaining appropriate security clearance from the Defense Security Service and for ensuring compliance by its employees and subcontractors(s) with the security regulations of the Government installation or Contractor (or subcontractor) facility where work is to be performed (See Attachment J.3 – DOD CONTRACT SECURITY CLASSIFICATION SPECIFICATION, DD-FORM 254).

The Contractor shall comply with the following Position Sensitivity Designations as defined under DOT Order 1630.2B, Personnel Security Management.

<table>
<thead>
<tr>
<th>Labor Category</th>
<th>Sensitivity Level</th>
</tr>
</thead>
<tbody>
<tr>
<td>[To Be Filled in upon issuance of TORFP]</td>
<td>[insert number]</td>
</tr>
<tr>
<td>[To Be Filled in upon issuance of TORFP]</td>
<td>[insert number]</td>
</tr>
<tr>
<td>[To Be Filled in upon issuance of TORFP]</td>
<td>[insert number]</td>
</tr>
</tbody>
</table>

The Contractor must possess and maintain a Secret Facility Security Clearance in accordance with the Industrial Security Regulation (DOD 5220.22R) for the receipt, generation, and storage of classified material. The Contractor must possess the clearance at time of task order award.
The Contractor shall be responsible for ensuring compliance by its employees and subcontractors with the security regulations of the Government installation or other facility where work is to be performed.

**H.12 REQUESTS TO ACQUIRE EQUIPMENT (MAR 2003)**

It may be necessary under this contract for the CO to allow the Contractor to acquire or lease equipment to perform certain tasks under the contract. The Contractor is required to submit requests to acquire equipment to the CO for approval. The request shall include at least the following information: (1) why the Contractor cannot provide the equipment from its own inventory, (2) the Contractor’s cost analysis considering whether to lease or purchase the equipment (See FAR 7.401), and (3) the Contractor’s analysis shall explain the competitive pricing and the fair and reasonable pricing determination for the subject equipment. The Contractor shall track the Contractor acquired equipment as Government Property in accordance with Government Property clauses incorporated elsewhere within this contract.

**H.13 SECURITY MEASURES ON THE VOLPE CENTER PREMISES (JAN 2008)**

Any work under this contract which is performed on site at the Volpe Center is subject to all provisions of this contract governing the work and the security requirements in place at the Center. The Contractor shall coordinate compliance with the CO and COTR.

(1) The Contractor is responsible for ensuring that personnel follow the security requirements and regulations of the Volpe Center Security Operations Office.

(2) The Contractor is responsible for obtaining a copy of the Center's security requirements/regulations, VNTSC Selected Directive 1600.3, Admittance to Volpe Center Buildings.

(3) All items of Government Property are subject to the Center's security regulations.

(4) In order to obtain items such as room keys, parking gate keys, and Identification Badges, the Contractor shall:

   (a) Submit a written request for these items of property to the CO and COTR, who will make arrangements with the Volpe Center Security Operations Office for obtaining these items.

   (b) The Contractor shall submit, within ten (10) calendar days of contract award, a list of its on-site employees to the Volpe Center CO and COTR. Once the list is submitted, the Contractor will notify the CO and COTR of any staff changes when they occur, and shall update the list of on-site employees every six (6) months thereafter.

   (c) When an employee resigns, or is terminated or reassigned, the Contractor shall provide written evidence to the CO and COTR of the return of the items of Government Property noted in (4) above. The return of these items of property shall be coordinated with the Volpe Center Security Operations Office.
H.14 PERFORMANCE OF WORK AND SAFETY PROVISIONS ON GOVERNMENT PREMISES (APR 2003)

(a) Any work under this contract which is performed by the Contractor or any of its subcontractors on premises that are under direct control of the Government, is subject to the following provisions:

(1) Performance of work on Government premises shall be confined to the area(s) specified by the CO or designee. In performance of this work, the Contractor shall: (a) conform to all safety rules and requirements as in effect during the term of the contract; and (b) take such additional precautions as the contracting officer may reasonably require for safety and accident prevention purposes.

(2) The Contractor shall designate to the CO or designee, in writing, an on-the-premises representative to serve as point of contact.

(3) Any violation of applicable safety rules and requirements shall be promptly corrected as directed by the CO.

H.15 DOT INFORMATION SECURITY REQUIREMENTS (JAN 2010)

1. Access to Sensitive Information.
   a. Work under this contract may involve access to sensitive information as described in paragraph d. below that shall not be disclosed by the Contractor unless authorized by the CO or designee. To protect sensitive information, the Contractor shall provide training to any Contractor employee authorized access to sensitive information and, upon request of the Government, provide information as to an individual's suitability to have such authorization. Contractor employees found by the Government to be unsuitable or whose employment is deemed contrary to the public interest or inconsistent with the best interest of national security may be prevented from performing work under the particular contract when requested by the CO or designee.

   b. The Contractor shall ensure that Contractor employees are: (1) citizens of the United States of America or an alien who has been lawfully admitted for permanent residence or employment (indicated by immigration status) as evidenced by U.S. Citizenship and Immigration Services documentation; and (2) have background investigations in accordance with DOT Order 1630.2B, Personnel Security Management, and corresponding policy updates.

   c. The Contractor shall include the above requirements in any subcontract awarded involving access to Government facilities, sensitive information, and/or resources.

   d. Sensitive Information is proprietary data or other information that, if subject to unauthorized access, modification, loss, or misuse, could adversely affect national interest, conduct of Federal programs, or privacy of individuals specified in the Privacy Act but has not been specifically authorized to be kept secret in the interest of national defense or foreign policy under an Executive Order or Act of Congress.

2. IT Services.
a. The Contractor shall be responsible for IT security for all systems operated by or connected to a DOT network, regardless of location. This includes any IT resources or services through which the Contractor has physical or electronic access to the DOT’s sensitive information that directly supports the mission of the DOT (e.g., hosting the DOT’s e-Government sites or other IT operations). If necessary, the Government shall have access to Contractor and any subcontractor facilities, systems/networks operated on behalf of the DOT, documentation, databases, and personnel to carry out a program of IT inspection (to include vulnerability scanning), investigation, and audit to safeguard against threats and hazards to DOT data or IT systems.

b. Within 30 calendar days after any task order award, the Contractor shall develop and provide to the Government for approval an IT Security Plan that describes the processes and procedures the Contractor will follow in performance of this contract to ensure the appropriate security of IT resources developed, processed, or used under this contract. This plan shall be written and implemented in accordance with applicable Federal laws, including the FISMA of 2002, the Computer Security Act of 1987 (40 U.S.C. 1441 et seq.), the Clinger-Cohen Act of 1996, and the Government Information Security Reform Act (GISRA) of 2000, and meet Government IT security requirements, including Office of Management and Budget (OMB) Circular A-130, Management of Federal Information Resources, Appendix 111, Security of Federal Automated Information Resources; NIST Guidelines; the Federal Desktop Core Configuration (FDCC); the DOT’s CIOP and associated guidelines, and DOT Order 1630.2B, Personnel Security Management, and corresponding policy updates.

c. The Contractor shall screen its personnel requiring privileged access or limited privileged access to systems operated by the Contractor for DOT or interconnected to a DOT network in accordance with DOT Order 1630.2B, Personnel Security Management, and ensure Contractor employees are trained annually in accordance with OMB Circular A-130, FISMA, and NIST requirements with a specific emphasis on the Volpe Center’s Information Systems Rules of Behavior.

d. The Contractor shall immediately notify the CO and the COTR when an employee with access to DOT information systems is terminated.

e. The Contractor shall include the above requirements in any subcontract awarded for IT services.

f. IT means any equipment or interconnected system or subsystem of equipment used in the automatic acquisition, storage, manipulation, management, movement, control, display, switching, interchange, transmission, or reception of data or information and as further defined in OMB Circular A-130 and the FAR Part 2.

H.16 ACCOUNTING SYSTEM (DEC 2003)

A Prime Contractor is ineligible to receive a Cost-Plus-Fixed-Fee or Cost-Plus-Award-Fee task order unless it has an accounting system approved by a Federal Government agency. Also, consent will not be given for a Cost-Plus-Fixed-Fee or Cost-Plus-Award-Fee subcontract unless that particular subcontractor has an accounting system approved by a Federal Government agency.
H.17 CONSENT TO RELEASE GOVERNMENT-ORDERED ITEMS (JAN 2004)

The Contractor shall neither publish nor disclose in any manner without the written consent of the Contracting Officer the following items that may be ordered through the contract: materials, patterns, designs, sketches, drawings, and plans.

H.18 CONFLICTS OF INTEREST DISCLOSURE (MAR 2008)

(a) The Offeror shall provide a statement in its proposal which describes in a concise manner all past, present or planned organizational, financial, contractual or other interest(s) with an organization regulated by DOT, or with an organization whose interests may be substantially affected by Departmental activities, and which is related to the work under this solicitation. The interest(s) described shall include those of the proposer, its affiliates, proposed consultants, proposed subcontractors and key personnel of any of the above. Past interest shall be limited to within one year of the date of the Offeror's Technical Proposal. Key personnel shall include any person owning more than 20% interest in the Offeror, and the Offeror's corporate officers, its senior managers and any employee who is responsible for making a decision or taking an action on this contract where the decision or action can have an economic or other impact on the interests of a regulated or affected organization.

(b) The Offeror shall describe in detail why it believes, in light of the interest(s) identified in (a) above, that performance of the proposed contract can be accomplished in an impartial and objective manner.

(c) In the absence of any relevant interest identified in (a) above, the Offeror shall submit in its proposal a statement certifying that to its best knowledge and belief no affiliation exists relevant to possible conflicts of interest. The Offeror must obtain the same information from potential subcontractors prior to award of a subcontract.

(d) The Contracting Officer will review the statement submitted and may require additional relevant information from the Offeror. All such information, and any other relevant information known to DOT, will be used to determine whether an award to the Offeror may create a conflict of interest. If any such conflict of interest is found to exist, the Contracting Officer may

- (1) disqualify the Offeror, or
- (2) determine that it is otherwise in the best interest of the United States to contract with the Offeror and include appropriate provisions to mitigate or avoid such conflict in the contract awarded.

(e) The refusal to provide the disclosure or representation, or any additional information required, may result in disqualification of the Offeror for award. If nondisclosure or misrepresentation is discovered after award, the resulting contract may be terminated. If after award the Contractor discovers a conflict of interest with respect to the contract awarded as a result of this solicitation, which could not reasonably have been known prior to award, an immediate and full disclosure shall be made in writing to the Contracting Officer. The disclosure shall include a full description of the conflict, a description of the action the Contractor has taken, or proposes to take, to avoid or mitigate such conflict. The Contracting Officer may, however, terminate the contract for convenience if he or she deems that termination is in the best interest of the Government.
The following definitions are provided:

"Agency Access" means access to DOT facilities, sensitive information, information systems or other DOT resources.

"Applicant" is a contractor employee for whom the contractor submits an application for a DOT identification card.

"Contractor Employee" means prime contractor and subcontractor employees who require agency access to perform work under a DOT contract.

"Identification Card" (or "ID card") means a government issued or accepted identification card such as a Personal Identity Verification (PIV) card, a PIV-Interoperable (PIV-I) card from an authorized PIV-I issuer, or a non-PIV card issued by DOT, or a non-PIV card issued by another Federal agency and approved by DOT. PIV and PIV-I cards have physical and electronic attributes that other (non-PIV) ID cards do not have.

"Issuing Office" means the DOT entity that issues identification cards to contractor employees.

"Local Security Servicing Organization" means the DOT entity that provides security services to the DOT organization sponsoring the contract.

1. **Risk and Sensitivity Level Designations** - For contracts requiring access to DOT facilities, sensitive information, information systems or other DOT resources, the contractor employees will be required to complete background investigations, identity proofing, and government identification card application procedures to determine suitability for access. DOT will assign a risk and sensitivity level designation to the overall contract and/or to contractor employee positions by category, group or individual. The risk and sensitivity level designations will be the basis for determining the level of personnel security processing required for contractor employees.

<table>
<thead>
<tr>
<th>IF THE DESIGNATED RISK IS:</th>
<th>THE BACKGROUND INVESTIGATION IS:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low</td>
<td>National Agency Check with Written Inquiries (NACI)</td>
</tr>
<tr>
<td>Moderate</td>
<td>Minimum Background Investigation (MBI)</td>
</tr>
<tr>
<td>High</td>
<td>Background Investigation (BI)</td>
</tr>
</tbody>
</table>

Contractor employees may also be required to obtain security clearances (i.e., Confidential, Secret, or Top Secret). National Security work designated "special sensitive," "critical sensitive," or "non-critical sensitive" will determine the level of clearance required for contractor employees. Personnel security clearances for national security contracts in DOT will be processed according to the Department of Defense National Industrial Security Program Operating Manual (NISPOM).
2. **Pre-screening of Contractor Employees** - The contractor must pre-screen individuals designated for employment under any DOT contract by verifying minimal suitability requirements to ensure that only quality candidates are considered for contract employment, and to mitigate the burden on the Government of conducting background investigations on objectionable applicants. The contractor must exercise due diligence in pre-screening all employees prior to submission to DOT for agency access. DOT may decline to grant agency access to a contractor employee for reasons including, but not limited to:

a) Conviction of a felony, a crime of violence, or a misdemeanor involving moral turpitude.

b) Falsification of information entered on forms or of other documents submitted.

c) Improper conduct including criminal, infamous, dishonest, immoral, or notoriously disgraceful conduct or other conduct adverse to the Government regardless of whether the conduct is directly related to the contract.

d) Any behavior judged to pose a potential threat to DOT facilities, sensitive information, information systems or other resources.

3. **Citizenship and Alien Status** - The contractor must monitor an alien's continued authorization for employment in the United States. The contractor must provide documentation to the Contracting Officer or the Contracting Officer's Technical Representative during the background investigation process that validates that the E-Verify requirement has been met for each contractor employee.

4. **Background Investigation and Adjudication** - The contractor employee must have a favorable adjudication of background investigation before DOT will issue an ID card to the contractor employee granting access to DOT facilities, sensitive information, information systems or other DOT resources. DOT may accept favorable adjudications of background investigations from other Federal agencies when applicants have held PIV cards issued by those agencies with no break in service. DOT may also accept PIV-1 (interoperable) cards issued by an authorized PIV-1 issuer as evidence of identity. A favorable adjudication does not preclude DOT from initiating a new investigation when deemed necessary. At a minimum, the FBI National Criminal History Check (fingerprint check) must be favorably completed before a DOT identification card can be issued. Each contractor must use the Office of Personnel Management’s (OPM) e-QIP system to complete any required investigative forms. Instructions for obtaining fingerprints will be provided by the COTR or CO. The DOT Office of Security, M-40, or a DOT organization delegated authority by M-40, is responsible for adjudicating the suitability of contractor employees.

5. **Agency Access Denied** - Upon contract award, DOT will initiate the agency access procedure for all contractor employees requiring access to DOT facilities, sensitive information, information systems and other DOT resources for contract performance. DOT may deny agency access to any individual about whom an adverse suitability determination is made. Failure to submit the required security information or to truthfully answer all questions shall constitute grounds for denial of access. The contractor must not provide agency access to contractor employees until the COTR or CO provides notice of approval, which is authorized only by the DOT Office of Security (M-40) or a DOT organization delegated authority by M-40. Where a
proposed contractor's employees are denied agency access by the Government or, if for any reason proposed applications are withdrawn by the contractor during the agency access process, the additional costs and administrative burden for conducting additional background investigations caused by a lack of effective pre-screening or planning on the part of the contractor may be considered as part of the contractor's overall performance evaluation.

6. Identification Card Application Process- the COTR will be the DOT ID card Sponsor and point of contact for the contractor's application for a DOT ID card. The COTR shall review and approve the DOT ID card application before an ID card is issued to the applicant.

An applicant may be issued either a Personal Identity Verification (PIV) card that meets the standards of Homeland Presidential Security Directive (HSPD-12), or an applicant may be issued a non-PIV card. Generally, a non-PIV card will be issued for contracts that expire in six months or less, including option periods. The COTR may request the issuing office to waive the six month eligibility requirement when it is in DOT's interest for contract performance.

The applicant must complete a DOT on-line application for a PIV card. For a non-PIV card, the applicant must complete and submit a hard copy of Form 1681 to the COTR/Sponsor. Regardless of the type of card to be issued (PIV or non-PIV), the applicant must appear in-person to provide two forms of identity source documents in original form to DOT. The identity source documents must come from the list of acceptable documents included in Form I-9, OMB No. 1115-0136, Employment Eligibility Verification. At least one document must be a valid State or Federal government-issued picture identification. For a PIV card, the applicant may be required to appear in-person a second time for enrollment and activation.

7. Identification Card Custody and Control- The contractor is responsible for the custody and control of all forms of government identification issued by DOT to contractor employees for access to DOT facilities, sensitive information, information systems and other DOT resources. The contractor must immediately notify the COTR or, if the COTR is unavailable, the CO when a contractor employee no longer requires agency access due to transfer, completion of a project, retirement, removal from work on the contract, or termination of employment.

The contractor is responsible for maintaining and safeguarding the DOT ID card upon issuance to the contractor employee. The contractor must ensure that contractor employees comply with DOT requirements concerning the renewal, loss, theft, or damage of an ID card. The contractor must immediately notify the COTR or, if the COTR is unavailable, the CO when an ID card is lost, stolen or damaged.

Failure to comply with the requirements for custody and control of DOT ID cards may result in withholding final payment or contract termination based on the potential for serious harm caused by inappropriate access to DOT facilities, sensitive information, information systems or other DOT resources.

a) Renewal: A contractor employee’s DOT issued ID card is valid for a maximum of three years or until the contract expiration date (including option periods), whichever occurs first. The renewal process should begin six weeks before the PIV card expiration
date. If a PIV card is not renewed before it expires, the contractor employee will be required to sign-in daily for facility access and may have limited access to information systems and other resources.

b) **Lost/Stolen**: Immediately upon detection, the contractor or contractor employee must report a lost or stolen DOT ID card to the COTR, or if the COTR is unavailable, the CO, the issuing office, or the local servicing security organization. The contractor must submit an incident report within 48 hours, through the COTR or, if the COTR is unavailable, the CO, the issuing office, or the local security servicing organization describing the circumstances of the loss or theft. The contractor must also report a lost or stolen PIV card through the DOT on-line registration system. If the loss or theft is reported by the contractor to the local police, a copy of the police report must be provided to the COTR or CO. From the date of notification to DOT, the contractor must wait three days before getting a replacement ID card. During the 3-day wait period, the contractor employee must sign in daily for facility access.

c) **Replacement**: An ID card will be replaced if it is damaged, contains incorrect data, or is lost or stolen for more than 3 days, provided there is a continuing need for agency access to perform work under the contract.

8. **Surrender of ID Cards**: Upon notification that routine access to DOT facilities, sensitive information, information systems or other DOT resources is no longer required, the contractor must surrender the DOT issued ID card to the COTR, or if the COTR is unavailable, the CO, the issuing office, or the local security servicing organization in accordance with agency procedures.

9. **Use of This Clause**: The contractor is required to include these clauses in any subcontracts that require the subcontractor or subcontractor’s employees to have access to DOT facilities, sensitive information, information systems or other resources.
SECTION I - CONTRACT CLAUSES

1.1 FAR 52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses, by reference, with the same force and effect as if they were given in full text. Upon request, the CO will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

I.2 FAR 52.204-1 APPROVAL OF CONTRACT (DEC 1989)

This contract is subject to the written approval of the Chief of the Contracting Office, and shall not be binding until so approved.

I.3 FAR 52.209-9 UPDATES OF PUBLICLY AVAILABLE INFORMATION REGARDING RESPONSIBILITY MATTERS (JAN 2011) ALTERNATE I (JAN 2011)

(a) The Contractor shall update the information in the Federal Awardee Performance and Integrity Information System (FAPIIS) on a semi-annual basis, throughout the life of the contract, by posting the required information in the Central Contractor Registration database at [http://www.ccr.gov](http://www.ccr.gov).

(b)(1) The Contractor will receive notification when the Government posts new information to the Contractor’s record.

(2) The Contractor will have an opportunity to post comments regarding information that has been posted by the Government. The comments will be retained as long as the associated information is retained, i.e., for a total period of 6 years. Contractor comments will remain a part of the record unless the Contractor revises them.

(3)(i) Public requests for system information posted prior to April 15, 2011, will be handled under Freedom of Information Act procedures, including, where appropriate, procedures promulgated under E.O. 12600.

(ii) As required by section 3010 of Public Law 111-212, all information posted in FAPIIS on or after April 15, 2011, except past performance reviews, will be publicly available.

Alternate I (Jan 2011). As prescribed in 9.104-7(c)(2), redesignate paragraph (a) of the basic clause as paragraph (a)(1) and add the following paragraph (a)(2):
(2) At the first semi-annual update on or after April 15, 2011, the Contractor shall post again any required information that the Contractor posted prior to April 15, 2011.

II. TRANSPORTATION ACQUISITION REGULATION (48 CFR CHAPTER 12) CLAUSES

I.4 TAR 1252.237-73 KEY PERSONNEL (APR 2005)

(a) The personnel as specified below are considered essential to the work being performed under this contract and may, with the consent of the contracting parties, be changed from time to time during the course of the contract by adding or deleting personnel, as appropriate.

(b) Before removing, replacing, or diverting any of the specified individuals, the Contractor shall notify the contracting officer, in writing, before the change becomes effective. The Contractor shall submit information to support the proposed action to enable the contracting officer to evaluate the potential impact of the change on the contract. The Contractor shall not remove or replace personnel under this contract until the Contracting Officer approves the change. An individual may be named more than once to satisfy the requirements.

The Key Personnel under this Contract are:

(1) Program Manager: Patrick Pierce
(2) Task Area 1 Manager: Steven R. Hansen
    Task Area 2 Manager: Jim Bocchi
    Task Area 3 Manager: Joel M. Wichgers
    Task Area 4 Manager: Kenneth Tollstam
    Task Area 5 Manager: John Uittenbogaard
    Task Area 6 Manager: Jim Bocchi
    Task Area 7 Manager: Steven R. Hansen
(3) Contract Administrator/Contracting Officer: Joshua Korn
(4) To be specified under individual task orders

THE FOLLOWING CLAUSES, I.5, I.6, AND I.7, APPLY TO AWARD FEE TASK ORDERS ONLY:

I.5 TAR 1252.216-71 DETERMINATION OF AWARD FEE (APR 2005)

(a) The Government shall evaluate Contractor performance at the end of each specified evaluation period to determine the amount of award. The Contractor agrees that the amount of award and the award fee methodology are unilateral decisions to be made at the sole discretion of the Government.

(b) Contractor performance shall be evaluated according to a Performance Evaluation Plan. The Contractor shall be periodically informed of the quality of its performance and areas in which improvements are expected.

(c) The Contractor shall be promptly advised, in writing, of the determination and reasons why the award fee was or was not earned. The Contractor may submit a performance self-evaluation for each evaluation period. The amount of award is at the sole discretion of the Government but any self-evaluation received within ____ (insert number) days after the end of the current
evaluation period will be given such consideration, as may be deemed appropriate by the Government.

(d) The amount of award fee which can be awarded in each evaluation period is limited to the amounts set forth at (*identify location of award fee amounts). Award fee which is not earned in an evaluation period cannot be reallocated to future evaluation periods.

* To be Determined (TBD) at Task Order Level

I.6 TAR 1252.216-72 PERFORMANCE EVALUATION PLAN (OCT 1994)

NOTE: The term “task order” shall be substituted for the word “contract” in the following clause:

(a) A Performance Evaluation Plan shall be unilaterally established by the Government based on the criteria stated in the contract and used for the determination of award fee. This plan shall include the criteria used to evaluate each area and the percentage of award fee (if any) available for each area. A copy of the plan shall be provided to the Contractor (insert number) calendar days prior to the start of the first evaluation period.

(b) The criteria contained within the Performance Evaluation Plan may relate to: (1) Technical (including schedule) requirements, if appropriate; (2) Management; and (3) Cost.

(c) The Performance Evaluation Plan may, consistent with the contract, be revised unilaterally by the Government at any time during the period of performance. Notification of such changes shall be provided to the Contractor (insert number) calendar days prior to the start of the evaluation period to which the change will apply.

* To be Determined (TBD) at Task Order Level

I.7 TAR 1252.216-73 DISTRIBUTION OF AWARD FEE (APR 2005)

(a) The total amount of award fee available under this contract is assigned according to the following evaluation periods and amounts:

Evaluation Period: *

Available Award Fee: *

(b) After the Contractor has been paid 85 percent of the base fee and potential award fee, the Government may withhold further payment of the base fee and award fee until a reserve is set aside in an amount that the Government considers necessary to protect its interest. This reserve shall not exceed 15 percent of the total base fee and potential award fee or $100,000, whichever is less. Thereafter, base fee and award fee payments may continue.

(c) In the event of contract termination, either in whole or in part, the amount of award fee available shall represent a prorata distribution associated with evaluation period activities or events as determined by the Government.
(d) The Government will promptly make payment of any award fee upon the submission by the Contractor to the contracting officer's authorized representative, of a public voucher or invoice in the amount of the total fee earned for the period evaluated. Payment may be made without using a contract modification.

* To be Determined (TBD) at Task Order Level

ATTACHMENT J.2 - LABOR CATEGORY QUALIFICATIONS

TRAFFIC MANAGEMENT INFRASTRUCTURE SYSTEMS

SENIOR STAFF - to perform successfully in this capacity, the individual must have a combination of education and experience totaling twenty (20) years in a technical area directly related to the Statement of Work (SOW).

MIDDLE STAFF - to perform successfully in this capacity, the individual must have a combination of education and experience totaling sixteen (16) years in a technical area directly related to the SOW.

STAFF - to perform successfully in this capacity, the individual must have a combination of education and experience totaling twelve (12) years in a technical area directly related to the SOW.

JUNIOR STAFF - to perform successfully in this capacity, the individual must have a combination of education and experience totaling eight (8) years in a technical area directly related to the SOW.

SENIOR TECHNICIAN - to perform successfully in this capacity, the individual must have a combination of education and experience totaling ten (10) years in a technical area directly related to the SOW.

TECHNICIAN - to perform successfully in this capacity, the individual must have a combination of education and experience totaling two (2) years in a technical area directly related to the SOW.

CONTRACT ADMINISTRATOR/CONTRACTING OFFICER - to perform successfully in this capacity, the individual must have a combination of education and experience totaling ten (10) years in a position directly related in the field of contract administration.

The aforementioned annual experience totals may be achieved by following the below Summary Table. For purposes of this table, excluding Contracts Administrator, please note the following.

- A Ph.D. degree in a directly related discipline to the SOW is equivalent to sixteen (16) years of professional experience.
- A Masters degree in a directly related discipline to the SOW is equivalent to twelve (12) years of professional experience.
- A Bachelors degree in a directly related discipline to the SOW is equivalent to eight (8) years of professional experience.
- An individual with no undergraduate or post-graduate degree must possess the full amount of required yearly work experience in a field directly related to the SOW to qualify for the appropriate labor category.

**NOTE**: The Government may, at the task order level and on a case-by-case basis, require certain degrees or certifications. In addition, the Contractor may, at the task order level and on a case-by-case basis, offer to the Contracting Officer a candidate with special or market-scarce skills/qualifications for consideration in any of the labor categories cited above.
ATTACHMENT J.3 – DOD CONTRACT SECURITY CLASSIFICATION
SPECIFICATION, DD-FORM 254

DEPARTMENT OF DEFENSE

CONTRACT SECURITY CLASSIFICATION SPECIFICATION

(The requirements of the DoD Industrial Security Manual apply
to all security aspects of this effort.)

1. CLEARANCE AND SAFEGUARDING
   a. FACILITY CLEARANCE REQUIRED
   b. LEVEL OF SAFEGUARDING REQUIRED

2. THIS SPECIFICATION IS FOR: (x and complete as applicable)
   a. PRIME CONTRACT NUMBER
   b. SUBCONTRACT NUMBER
   c. SOLICITATION OR OTHER NUMBER

3. THIS SPECIFICATION IS: (x and complete as applicable)
   a. ORIGINAL (Complete date in all cases)
   b. REVISED (Supersedes all previous specs)
   c. FINAL (Complete Item 5 in all cases)

4. THIS IS A FOLLOW-ON CONTRACT? YES NO. If Yes, complete the following:
   Classified material received or generated under (Preceding Contract Number) is transferred to this follow-on contract.

5. IS THIS A FINAL DD FORM 254? YES NO. If Yes, complete the following:
   In response to the contractor’s request dated retention of the identified classified material is authorized for the period of __________

6. CONTRACTOR (Include Commercial and Government Entity (CAGE) Code)
   a. NAME, ADDRESS, AND ZIP CODE
   b. CAGE CODE
   c. COGNIZANT SECURITY OFFICE (Name, Address, and Zip Code)

7. SUBCONTRACTOR
   NAME, ADDRESS, AND ZIP CODE
   b. CAGE CODE
   c. COGNIZANT SECURITY OFFICE (Name, Address, and Zip code)

8. ACTUAL PERFORMANCE
   a. LOCATION
   b. CAGE CODE
   c. COGNIZANT SECURITY OFFICE (Name, Address, and Zip Code)

9. GENERAL IDENTIFICATION OF THIS PROCUREMENT

DD FORM 254, DEC 1999

12. PUBLIC RELEASE. Any information (classified or unclassified) pertaining to this contract shall not be released for public dissemination by the Industrial Security Manual unless it has been approved for public release by appropriate U.S. Government authority. Proposed public releases shall be submitted for approval prior to release

- Direct
- Through (Specify):

the individual indicated in block 16e to the Directorate for Freedom of Information and Security Review, Office of the Assistant Secretary of Defense (Public Affairs) for review. In the case of non-DoD Sponsoring agencies, requests for disclosure shall be submitted to that agency.

13. SECURITY GUIDANCE. The security classification guidance needed for this classified effort is identified below. If any difficulty is encountered in applying this guidance or if any other contributing factor indicates a need for changes in this guidance, the contractor is authorized and encouraged to provide recommended changes; to challenge the guidance or the classification assigned to any information or material furnished or generated under this contract; and to submit any questions for interpretation of this guidance to the official identified below. Pending final decision, the information involved shall be handled and protected at the highest level of classification assigned or recommended (Fill in as appropriate for the classified effort. Attach, or forward under separate correspondence, any documents/guides/extracts referenced herein. Add additional pages as needed to provide complete guidance.)

Specific and complete classification guidance will be provided by Volpe Center Sponsoring agencies if and when services requiring clearance are performed.
14. ADDITIONAL SECURITY REQUIREMENTS. Requirements, in addition to ISM requirements, are established for this contract. (If Yes, identify the pertinent contractual clauses in the contract document itself, or provide any appropriate statement which identifies the additional requirements. Provide a copy of the requirements to the cognizant security office. Use Item 13 if additional space is needed.)

Yes ☐  No ☐

15. INSPECTIONS. Elements of this contract are outside the inspection responsibility of the cognizant security office. (If Yes, explain and identify specific areas or elements carved out and the activity responsible for inspections. Use Item 13 if additional space is needed.)

Yes ☐  No ☐

16. CERTIFICATION AND SIGNATURE. Security requirements stated herein are complete and adequate for safeguarding the classified information to be released or generated under this classified effort. All questions shall be referred to the official named below.

a. TYPED NAME OF CERTIFYING OFFICIAL
b. TITLE
c. TELEPHONE (Include Area Code)

d. ADDRESS (Include Zip Code)

INTRODUCTION

Lockheed Martin Corporation Information Systems and Global Solutions (IS&GS) is pleased to submit this Small Business Subcontracting Plan. Through this plan, IS&GS has established business-area processes for the utilization of Small Business (SB), Small Disadvantaged Business (SDB), Women-Owned Small Business (WOSB), Veteran Owned Small Business (VOSB), Service Disabled Veteran Owned Small Business (SDVOSB), and small businesses located in Historically Underutilized Business Zones (HUBZones). The Lockheed Martin Executive Office has issued a corporate policy statement on its small business programs, which supports the U.S. government policy that these entities shall have the maximum practicable opportunity to compete for subcontract awards consistent with the efficient performance of all government contracts. This Subcontracting Plan is applicable to all IS&GS operating companies with the exception of joint ventures.

OVERVIEW

Lockheed Martin Corporation (LMC) is a large U.S. government contractor with over $30 billion dollars in annual sales. The Corporation has four core business areas. Each LMC business area is comprised of one or more operating companies (also known as business units), which are located throughout the United States. Supplier Diversity Professionals are located at each operating company having a procurement function and the Corporation’s headquarters located in Bethesda, Maryland.

- **Aeronautics (AERO):** Fort Worth, TX - World leader in air power projection including combat, air mobility, special mission/reconnaissance aircraft and design & development of advanced systems.

- **Electronic Systems (ES):** Bethesda, MD – Premier systems and software engineering capability in air and missile defense, precision munitions, force transformation, and homeland security.

- **Space Systems (SS):** Denver, CO - Leader in military, civil and commercial space products and services.

- **Information Systems & Global Solutions (IS&GS), Gaithersburg, MD** - Leading federal services and Information Technology contractor with a strong heritage of delivering world-class solutions and delivering advanced technology across a broad spectrum of domains.

The recent formation of the IS&GS business area is an evolution of the Corporation’s horizontal integration strategy and a further integration and alignment of capabilities and resources – connecting cultures, capabilities, people and processes. It is designed to enhance flexibility and agility in providing comprehensive solutions to customers’ operational and business challenges.

MANAGEMENT COMMITMENT

LMC senior management recognizes that small business concerns are a critical national resource, and are essential to our ability to successfully deliver products and services that meet the needs of our customers the first time, every time. For that reason,
our management team is committed to providing the necessary resources to meet the objectives and special initiatives reported to our customers.

- **Corporate:** The Senior Vice President, Operations and Program Management has executive responsibility for the Corporation’s supplier diversity function. In this capacity, he is responsible for ensuring that the Corporation’s policies and business practices do not adversely impact the ability of small business to participate in LMC’s subcontracting process. The Company employs a corporate director of Supplier Diversity to manage day-to-day program activities and to maintain appropriate focus on supplier diversity related issues. This individual reports directly to the vice president of GSCM – reporting to the Senior Vice President, Operations and Program Management - and provides leadership and direction to the corporation’s supplier diversity team.

- **Business Area:** The Corporation designates a manager of supplier diversity for each of its four core business areas. These individuals are responsible for managing the supplier diversity related activity of their respective businesses. As it relates to performance under this plan, they are responsible for ensuring that all subcontracting goals for their respective business area are met.

- **Operating Company** (Business Unit): The senior executive at each LMC operating company is responsible for the supplier diversity program performance of their organization. Each is required to designate a small business liaison officer to serve as the primary point of contact for small businesses and corporate personnel. These individuals are also responsible for generating performance reports and managing outreach activities. Subcontracting forecasts, mentor protégé selection and program management, special initiatives, and supplier interaction all originate at this level. Additionally, each business unit will also appoint Small Business Representatives (SBR) to provide additional site and program support as required.

4. **CORPORATE VISION**

Lockheed Martin Corporation applies its vision, its purpose and its values to customer priorities:

- **Our vision:** to be the world’s best advanced-technology systems integrator.

- **Our purpose:** to achieve Mission Success by attaining total customer satisfaction and meeting all our commitments. Our Values are ethics, excellence, “Can-Do”, integrity, people and teamwork; achieving results through leadership and teamwork, commitment of our people to our customers, excellence as a premier Systems Integrator, innovation in technology and business and partnerships worldwide.

5. **CORPORATE POLICY**

Lockheed Martin (LM) has established corporate policy statements covering its key business processes and initiatives. These policy statements are governed by the Executive
Office and create standards of execution for the entire Corporation. The relevant summary excerpt from LMC Corporate Policy Statement CPS-040 follows:

“It is LMC policy to provide subcontracting opportunities to small businesses to the maximum extent practical. This policy applies to opportunities arising from government and commercial programs and internal projects. Accordingly, LMC will institute and maintain a proactive Supplier Diversity Program designed to develop the growth and competitive capabilities that will enable small businesses to become responsible suppliers to the Corporation. The Supplier Diversity Program will be consistent with LMC’s policy of considering all suppliers fairly in competition for requirements falling within their demonstrated capabilities…”

6. DEFINITIONS

The definitions used are in accordance with the Federal Acquisition Regulation Parts 2, 19, and 25.

Note: Any small business that qualifies for multiple statuses will also be considered as a part of each of those multiple categories.

7. SUBCONTRACTING PLAN

A) General - In accordance with FAR 52.219-9, Small Business Subcontracting Plan, this Subcontracting Plan contains all the required elements of an individual Subcontracting Plan and may be incorporated by reference in United States prime contracts awarded to LM IS&GS.

The individual Subcontracting Plan for Small Business concerns will set forth the following variables, as well as any deviations hereto deemed necessary by the cognizant Contracting officer, which are applicable to the specific prime contract in which this individual plan is incorporated.

a. Goals for each SB category, expressed in percentages of total planned subcontracting dollars and of total contract value when required for the base and each option period.

b. Total dollars planned to be subcontracted.

c. Total dollars planned to be subcontracted to each SB category.

d. Description of the principle types of supplies/services to be subcontracted and the types planned for each SB category.

e. Description of the method used to develop the subcontracting goals.

f. Statement as to whether indirect costs are included in establishing goals.

g. Name of the administrator of the individual subcontracting plan (normally the Supplier Diversity Business Area Lead)

LM IS&GS will provide maximum practical opportunity to SB’s to compete for subcontract awards. The individual Subcontracting Plan will include this group of potential subcontractors, through the efforts outlined in this Subcontracting Plan and the goals
established in this Individual Subcontracting Plan will attempt to maximize subcontract awards to SB’s.

Lockheed Martin Corporate Policy Statement CPS-040, Supplier Diversity Program and Lockheed Martin Acquisition Procedure (LMAP) 12.450, Supplier Diversity Program establishes the requirement for a Supplier Diversity Program. Our company-wide policies and procedures demonstrate not only management’s interest to ensure compliance with Public Laws and regulations, but also management’s recognition of its social and business responsibility to the community and its customers.

B) Source Identification - LMC Supplier Diversity advocates assist in identifying qualified SB, SDB, WOSB, HUBZone, VOSB, and SDVOSB concerns as potential sources for participation in procurement opportunities. Commonly used resources include:

- U.S. Federal Government’s Central Contractor Registration (CCR)
- Center for Veteran Enterprise
- National Regional Purchasing Councils Certified Supplier Listings
- The U.S. Veterans Administration
- An Inventory of the Capabilities of the HBCUs, MIs, and TCUs.
- LMC SupplierNet and Trading Partner Management Data Base
- Directories for Women’s Business Enterprises
- Diversity Resources National Resources Directory
- Procurement Technical Assistance Centers
- Local Chambers of Commerce, Business Trade Associations

Lockheed Martin requires suppliers to enter their profile on our SupplierNet Database. This profile includes representation as to business size and socioeconomic category. The form for this profile includes information regarding “Penalty to Suppliers for False Certifications” as required by FAR.

C) Efforts to Ensure Equitable Participation - Special effort is made to identify and facilitate procurement opportunities, solicit, and fairly consider SB concerns in subcontracting. LM Corporate Policy Statements, CPS-108 Make or Buy, requires the Corporation to provide the best value to our customers, and apply competitive principles in determining whether to make or buy goods and services. Make or Buy programs comply with all applicable government regulations and inclusion of small businesses.

- Requirements are reviewed, consistent with sound business practices, for possible breakout for procurement from all SB concerns.
- Make or Buy deliberations include adequate and timely consideration of all Small Business concerns capabilities.

- Development work, likely to lead to production, is examined for possible placement with Small Business concerns.

- When appropriate, competition may be restricted to qualified SB concerns.

  LMC Supplier Diversity program, working with the strategic teams and procurement organizations, will aggressively pursue procurement opportunities for SB concerns. Consideration will be extended to LMC Mentor Protégé participants. Minority, veteran, and women-owned business associations around the country will be used to a greater extent to meet the goals established under this plan. Special efforts will also be made during the following activities to locate and counsel SB concerns from the following resources.

  - U.S. Small Business Administration Small Business Week Conference and Trade Fair
  - District Small Business Administration Matchmaking Events and Trade Fairs
  - National Minority Supplier Development Council Annual Conference and Trade Fair
  - LMC Supplier Information Sessions
  - National American Indian Center’s Reservation & Economic Summit
  - U.S. Department of Commerce – Minority Business Development Agency
  - Regional and National Minority Enterprise Development (MED) Week Conferences and Trade Fairs
  - Government and Industry Sponsored Trade Fairs around the country

  A concerted effort will be made by LM IS&GS to identify and facilitate procurement opportunities, solicit, and fairly evaluate all small business concerns. To this end IS&GS will:

  - Ensure that bidding period, delivery schedules, and all other elements of solicitations do not include provisions that unfairly restrict or eliminate inclusion of small business concerns.
  - Where practical, consider breaking up order requirements to include small business concern & HBCU/MI/TCU participation.
  - Ensure that make-buy deliberations consider the potential impact on small business subcontracting.
  - Work with engineering and program personnel to evaluate small business concerns during the design and development phase.
- Ensure that specifications, drawings, and other relevant data are made available to small business concerns in a timely manner.
- Use restricted competitions, where appropriate and practical.
- Provide counseling and other forms of assistance to small business concerns to the extent that it does not compromise the integrity of the Corporation’s procurement process.
- Authorize progress payments and/or milestone payments to small business concerns in instances where considerable investment is required to perform under a IS&GS subcontract or purchase order.
- Provide small business concerns with the use of LM owned tooling and equipment, where practical.
- Host trade fairs and conferences whereby potential suppliers can meet key members of the LM engineering, program management, manufacturing, and procurement staff.

**D) Supplier Recognition** - Lockheed Martin believes in recognizing the contributions of suppliers and rewarding excellence across the Lockheed Martin enterprise. As such, both the STAR and LM21 Best Practices programs are corporate-wide programs recognizing suppliers for their accomplishments for quality, schedule, affordability, management, and process improvements. Suppliers benefit from the program by having greater subcontracting opportunities. IS&GS benefits by having a more reliable supply base that produces quality product and delivers it on time. Last, but certainly not least, our customers benefit by having quality product to support the needs of on-time and on-budget programs.

**E) Goals**

Categories of procurement activity considered in establishing its goals are: (i) planned direct materials, subcontracts and services to be procured from known first-tier suppliers and charged directly to the prime contract, (ii) bill of material items (direct charge inventories), and (iii) indirect purchases non-production materials, overhead, Company-owned assets, independent research and development, and bid and proposal items. The part of the goals for (i) and (ii) above are established by a thorough analysis of all planned material requirements necessary to support the prime contract effort, and an evaluation of SB potential to supply those requirements.

h. The indirect portion of the goals, (iii) above is estimated by applying historical ratios to the proposed G&A, O/H, and burden dollars associated with the proposed effort. The ratios used for these estimates are projected from historical procurement and financial data accumulated in the procurement and finance data systems. These ratios are revised periodically based on historical data, and projected future opportunities.

The Supplier Diversity Professional Representatives monitor the goals. Computerized reports are generated to identify the number and dollar amounts of awards to SB’s on a monthly basis.
These reports provide the LMC SBLO’s and management with a continuous measurement of performance versus the overall goals.

**Program Administrators - Supplier Diversity Business Area Leads**

The responsibility for operational implementation and administration of this plan, as well as the implementation of the supplier diversity program elements specified in Corporate Policy Statement, is vested in the managers of supplier diversity at the business area level, and the small business liaison officers at the operating company (business unit) level. These individuals provide overall guidance and support to buyers, engineers, and anyone else involved in source selection process. The duties of these individuals include, but are not limited to the following:

i. Identification of areas where subcontract awards may be made, such as contract or independent research and development programs, scientific and technical studies, and other subcontracts in support of program and general administrative activities and plant operations.

j. Participation in appropriate industry association activities, local trade associations, community awareness programs designed to promote the merits of LMC as a business leader and an appropriate partner, characterize the qualities the Corporation seeks in its suppliers, and convey the kinds of subcontracting opportunities available within the business unit, business area, and Corporation.

k. Mentor-protégé programs and classes in conjunction with Engineering, Product Assurance, Global Supply Chain Management, Manufacturing, and other organizations, designed to enable small businesses to qualify technically and administratively as LMC suppliers.

l. Coordination with the Supplier Diversity Organization to:
   
   Share best practices, lessons learned, and information regarding high quality sources.
   
   Provide qualified suppliers with the appropriate opportunities.
   
   Advocate corporate-wide procurements when beneficial to the Corporation and to small businesses.
   
   Form action teams dedicated to joint process improvement activities.
   
   Contribute to the development of cross-business area or business unit Mentor-Protégé programs and classes.
   
   Institute other initiatives that will increase opportunities for small businesses.

m. Follow-up and support to enable the Corporation’s small business suppliers to sustain the required performance levels.

n. Implement procedures as needed to implement this policy.
F) Description Of Efforts - A “Small Business Policy Statement” letter has been issued by the President of the Various LMC Business Areas and delineates the Company policy requiring personnel to maintain an active and effective Supplier Diversity (SD) Program. Specific direction ensures the implementation and management of a government approved subcontracting program per Lockheed Martin Acquisition Procedure 12.450, “Supplier Diversity Program”. LMC Senior Management are to ensure that all organizations generating requirements, or participating in the procurement process, are aware of their responsibility to actively support and participate in the SD Program and provide maximum practicable opportunity for qualified SB’s to participate in the performance of effort under LMC contracts. The Supplier Diversity Professional, SBLO, or Senior Acquisition Management representative, or designee at each site is empowered to ensure the implementation and management of a government approved subcontracting program, per LMAP 12.450, “Supplier Diversity Program”.

With the continuing active support and scheduled periodic reviews by Company senior management, and through the effective implementation of Company Procedures, IS&GS maintains a dynamic socioeconomic subcontracting program. In its ongoing commitment to maximize subcontracting with SB’s, a formal Supplier Diversity Program is managed by the SBLO. The responsibilities for program performance extend from the LMC SBLO through the Small Business Representatives in each business unit to the individual subcontract administratos and buyers. Supporting organizations provide technical and financial assistance to facilitate qualifying potential SB sources. Buying and subcontracting personnel are required to solicit qualified SB’s whenever practical and to assist them in obtaining subcontract awards.

The Supplier Diversity Professional Representatives assist and support the LMC SB Liaison Officer.

Supplier Diversity Professional (SDP) personnel are responsible for providing direction and coordination in their business units. SDP personnel coordinate with and provide support to the business in publicizing the supplier diversity objectives. SDP personnel also establish and provide outreach efforts to SB firms and assist in providing training to IS&GS business unit personnel on the requirements of supplier diversity. SDP personnel direct the administration and coordination of the supplier diversity activities to include the following:

- Provide assistance, as required, in developing SB subcontracting plans and goals; identify and consult with existing SB Sources.
- Coordinate and support special outreach efforts to SB firms.
- Participate in industrial procurement conferences, SB opportunity clinics, and other external meetings and seminars.
- Provide guidance and information on business opportunities and techniques of responding to solicitations and requests for proposals to representatives in the SB community.
• Arrange and conduct visits to potential SB sources to evaluate capabilities, capacity, equipment, and quality standards; provide information regarding new potential SB sources to personnel involved in the acquisition process.

The SD Representatives are assigned to support each business unit in the Procurement Organization. They monitor and assist in implementing the LMC supplier diversity program to ensure potential SB’s have the maximum practical opportunity to participate in required contract performance and that Company policies and procedures covering SB subcontracting are followed to the fullest extent consistent with effective contract performance. They also prepare, or support and guide in the preparation of SB subcontracting plans. Each business unit SD Representative works within the business unit to support individual programs and report performance to the LMC SBLO.

Corporate Policy Statement CPS-040, “Supplier Diversity Program” and CPS-113, “Corporate-Wide Procurement and Materiel Management”, and additional Company policies and procedures provide basic guidance in subcontracting to personnel involved in the acquisition process. This guidance is supplemented by periodic classes, which reference understanding of LMC’s commitment to an aggressive and successful Supplier Diversity Program.

Training is provided on an as-needed basis to the SD Representatives to ensure they have an up to date understanding of current compliance regulations. To assist in motivating personnel involved in the acquisition process, we are developing and planning on implementing procedures providing special recognition to individuals for extraordinary effort or achievement in support of the program.

Special assistance is provided to SB’s whenever feasible to permit increased participation in subcontracted effort. Where program requirements and schedules permit, personnel involved in the acquisition process arrange solicitations to provide time for preparation of bids, quantities, specifications and schedules to facilitate participation of SB’s. They provide or arrange for special management, technical or financial assistance to the extent required and feasible to permit maximum participation of SB’s.

G) Flow-Down Provisions - In support of Government contracts, LMC includes FAR 52.219-8 “Utilization of Small Business Concerns.” Additionally, FAR 52.219-9, “Small Business Subcontracting Plan” is included in all subcontracts, which are in excess of $550,000 and offer further subcontracting opportunities. Except for (i) subcontracts for services which are personal in nature or (ii) subcontracts (including all lower-tier subcontracts) which will be performed entirely outside of any state, territory or possession of the United States, the District of Columbia, or the Commonwealth of Puerto Rico. Additionally, subcontractors receiving a subcontract, or any modification or amendment thereto, in excess of $550,000 (or $1,000,000 if for construction of a public facility) are required to submit and implement a “Small Business Subcontracting Plan”. Provided (i) the clause entitled “Utilization of Small Business Concerns” applies, (ii) that the subcontract offers further subcontracting opportunities and (iii) that the subcontractor is not a SB.

Each Subcontractor’s Subcontracting Plan for Small Business Concerns shall be submitted in accordance with the following provisions:
Federal Acquisition Regulation (FAR) FAR 52.219-8 entitled, Utilization of Small Business Concerns

FAR 52.219-9 entitled, Small Business Subcontracting Plan, and

We require that our subcontractors with subcontracting plans agree to submit the ISR and/or the SSR using eSRS. To that end we provide our prime contract number, DUNS number, and the e-mail address of the Government or Contractor official responsible for acknowledging or rejecting the reports, to all first-tier subcontractors with subcontracting plans so they can enter this information into the eSRS when submitting their reports; and we require that each subcontractor with a subcontracting plan provide the prime contract number, its own DUNS number, and the e-mail address of the Government or Contractor official responsible for acknowledging or rejecting the reports, to its subcontractors with subcontracting plans.

Prior to issuing the definitized subcontract, the SB Liaison Officer or designee will review and approve the subcontractor’s plan. Required changes, if any, are negotiated with the subcontractor. The subcontractor’s plan is incorporated in the subcontract by reference and filed in the procurement package, prior to issuing the definitive subcontract or modification.

H) Reports - IS&GS will submit periodic reports at such times and in such detail as the contracting agency or the Small Business Administration (SBA) may require to determine the extent of compliance with this SB subcontracting plan. Reports on Government forms will be prepared and submitted in accordance with instructions on those forms. LMC will also cooperate fully in any studies or surveys which the contracting agency or the SBA may require verifying such compliance. The principle reports used for collecting and tracking SB commitment activity is as follows:

- Semi Annual, Individual Subcontracting Report (ISR) for individual contracts

- Semi Annual, Summary Subcontracting Report (SSR) (Each fiscal year end report include a breakout, in IS&GS format, of subcontract awards, in whole dollars, to small disadvantaged business concerns by North American Industry Classification System (NAICS) Major Group.

I) Records - IS&GS maintains the types of records as identified in Section F; REPORTS, necessary to demonstrate the methods by which goals will be met and by which provisions of this plan will be accomplished. Such records permit extraction of data to support subcontracting plan goals and to identify the extent of achievement of such goals. Records maintained are capable of identifying subcontractor business size and awards to SB’s. A computerized record system, supported by manual records where necessary, is utilized to compile the data necessary to support this subcontracting plan.

IS&GS also maintains the following records:

- Source lists, guides, and other data used to identify SB’s include the Small Business Administration’s Central Contractors Registration (CCR) and Lockheed Martin Trading Partner Management (TPM) internal online database. TPM also provides
notice to suppliers concerning penalties and remedies for misrepresentations of business status for the purpose of obtaining subcontracts.

- Documentation in the Procurement file and/or the procurement system, reflecting Procurement personnel contacts with organizations in an attempt to locate SB sources for the particular procurement. In accordance with LMAP 5.710, documentation for each subcontract solicitation resulting in an award of more than $100,000 indicates:

  q. Whether small business concerns were solicited and if not, why not.

  r. Whether small disadvantaged business concerns were solicited and if not, why not.

  s. Whether small women-owned business concerns were solicited and if not, why not.

  t. Whether small business concerns in a HUBZone were solicited and if not, why not.

  u. Whether veteran-owned small business concerns were solicited and if not, why not.

  v. Whether service-disabled VOSB concerns were solicited and if not, why not.

  w. And if applicable, the reason award was not made to an SB.

- The records documenting outreach efforts with (A) trade associations, (B) business development organizations, and (C) conferences and trade fairs to locate small business concerns, are maintained by the Supplier Diversity Program office.

  J) Supplier Diversity Training - LMC maintains a corporate-wide web-based supplier diversity training module, originated in 2004, which is available for all employees assigned to the Corporation’s Global Supply Chain Management organization authorized to procure or specify procurements. An update of this course was released in FY ’10. This course highlights the value supplier diversity brings to the Corporation and our customers. In addition LM IS&GS started a launch of short subject supplier diversity training available to various LM IS&GS audiences. In addition to these web-based offerings LMC and LM IS&GS maintain an intranet web site with information on Supplier Diversity available to all LM personnel. This information is augmented with face-to-face and / or tele-conference training for various groups as needed / requested.
SMALL BUSINESS SUBCONTRACTING PLAN

I. IDENTIFICATION DATA:

Address: Lockheed Martin Corporation, 700 N. Frederick Ave, Gaithersburg, MD 20879

Date Prepared: June 12, 2013

Description of Supplies/Services: TRAFFIC MANAGEMENT INFRASTRUCTURE SYSTEMS (TMIS) falls primarily in the area of transportation infrastructure, the foundation of facilities, equipment, and related services needed for the safe and secure movement of goods and people

Contract Number: DTRT57-12-D-30004

Estimated Contract Value $101,568,758

DUNS Number: 011367237

II. TYPE OF PLAN – FAR 19.701 (For definitions, see Cover Page and FAR clause 52.219-9):

_____ Commercial Plan

__X__ Individual Plan

_____ Master Plan (incorporated into Individual Plan)
III. GOALS:

</tr>
</tbody>
</table>

Lockheed Martin has identified SB concerns through prior work experience or through interest expressed in working with LM on the VOLPE Traffic Management Infrastructure Systems (TMIS) contract to perform/provide the following services or products. In addition the program office has established a database for registering and distributing opportunities. Registered SBs will be sent copies of all TOR that are released to see if there is any interest. In addition, if a SB has identified an opportunity and registers it with us, they will have the first right of refusal to lead the TOR when it is released.

LM has consistently met and or exceeded the SB requirements as a company. We have established plans to ensure that we meet the contract requirements. In our LM TMIS Program Management Plan (PMP) we have identified requirements to help identify ways to ensure that we are meeting the SB goals on each task order to help ensure that 62.4% contract goal is met. Our PMP addresses meeting the SB requirement of 62.4% on a Task Order by Task Order basis. Any waiver from this must be approved in advance by the PM. This helps ensure that we are working towards meeting our SB commitment.

The principal types of supplies and/or services that LM anticipates to be subcontracted and the identification of the type of business concern planned are as follows:

Lockheed Martin used the following method to develop the subcontracting goals:

The selection of subcontractors is based primarily on their abilities to efficiently perform subcontracts. During the proposal preparation subcontracted services and a bill of material is reviewed to identify potential opportunities for Service-Disabled Veteran-owned Small Businesses, Small Disadvantaged, Women-Owned Small Businesses and HUBZone Small Business Concerns. After subcontractor proposals and the bill of material is reviewed, it is priced using the lowest known prices. All relevant historical activities are considered, including past procurements.

The development of goals consists of historical data from previous contracts, statutory requirements, and consideration of the Task order Requirements. LM used several different resources to identify the capabilities of the SB community to provide the services identified in the Subcontracting plan. We reviewed the list of companies that provide similar services. We also researched our supplier database to identify the companies that provide these types of services/products. This will provide a large pool of contractors available to support our requirements and SB commitment on the plan, many of which we have established working relationships.

Lockheed Martin identifies potential subcontractors using the following source lists and organizations:

Lockheed Martin Corporation supplier diversity advocates assist in identifying qualified SB, SDB, WOSB, HUBZone, VOSB and SDVOSB concerns as potential sources for participation in procurement opportunities. Commonly used resources include: 1) U.S. Small Business Administration’s System For Award Management (SAM) database, 2) The US Department of Veterans Affairs Center for Veterans Enterprise, 3) National Regional Purchasing Councils Certified Supplier Listings, 4) Lockheed Martin Corporation EXOSTAR 5) Directories for Women’s Business Enterprises, 6) Diversity Resources National Resources Directory, 7) Procurement Technical Assistance Centers, and 8) Local Chambers of Commerce, Business Trade Associations.

Indirect costs ____HAVE BEEN (or) __X___HAVE NOT BEEN included in the dollar and percentage subcontracting goals stated above.

*If indirect costs HAVE been included, the method used to determine the proportionate share of indirect costs to be incurred with small business concerns was as follows:*

Not Applicable
IV. **PROGRAM ADMINISTRATOR:**

Name: Paula L. Jackson  
Title/Position: Small Business Liaison Officer (SBLO)  
Address: 230 Mall Blvd  
City/State/Zip Code: King of Prussia, PA 19406  
Telephone number: (856) 669-8581  
Fax number: (610) 354-4010  
Email Address: paula.l.jackson@lmco.com

Alternate POC with contact information: Robert Hepler  
email: robert.hepler@lmco.com  
Phone: 610-354-3519

**Duties:** The Program Administrator shall have general overall responsibility for the Contractors subcontracting program; i.e., developing, preparing, and executing subcontracting plans and monitoring performance relative to this particular plan. Such duties [found in FAR 52.219-9(e)] may include, but are not limited to, the following:

1. Assist SB, VOSB, SDVOSB, HUBZone, SDB and WOSB concerns by arranging solicitations, time for the preparation of bids, quantities, specifications, and delivery schedules so as to facilitate the participation by such concerns. Where the Contractor’s lists of potential SB, VOSB, SDVOSB, HUBZone, SDB and WOSB subcontractors are excessively long, reasonable effort shall be made to give all such small business concerns an opportunity to compete over a period of time.

2. Provide adequate and timely consideration of the potentialities of SB, VOSB, SDVOSB, HUBZone, SDB and WOSB concerns in all “make-or-buy” decisions.

3. Counsel and discuss subcontracting opportunities with representatives of SB, VOSB, SDVOSB, HUBZone, SDB and WOSB firms.

4. Confirm that a subcontractor representing itself as a HUBZone small business concern is identified as a certified HUBZone small business concern by accessing the System For Award Management (SAM) database or by contacting SBA.

5. Provide notice to subcontractors concerning penalties and remedies for misrepresentations of business status as SB, VOSB, SDVOSB, HUBZone, SDB and WOSB for the purpose of obtaining a subcontract that is to be included as part or all of a goal contained in the Contractor’s subcontracting plan.

6. Develop and promote company/division policy statements that demonstrate the company’s/division’s support for awarding contracts and subcontracts to SB, VOSB, SDVOSB, HUBZone, SDB and WOSB concerns.

7. Develop and maintain bidders’ lists of SB, VOSB, SDVOSB, HUBZone, SDB and WOSB concerns from all possible sources.
8. Ensure periodic rotation of potential subcontractors on bidders’ lists.

9. Ensure that SB, VOSB, SDVOSB, HUBZone, SDB and WOSB concerns are included on the bidders’ list for every subcontract solicitation for products and services they are capable of providing.

10. Ensure that subcontract procurement “packages” are designed to permit the maximum possible participation of SB, VOSB, SDVOSB, HUBZone, SDB and WOSB concerns.

11. Review subcontract solicitations to remove statements, clauses, etc., which might tend to restrict or prohibit SB, VOSB, SDVOSB, HUBZone, SDB and WOSB concerns.

12. Ensure that the subcontract bid proposal review board documents its reasons for not selecting any low bids submitted by SB, VOSB, SDVOSB, HUBZone, SDB and WOSB concerns.

13. Oversee the establishment and maintenance of contract and subcontract award records.

14. Attend or arrange for the attendance of company counselors at Business Opportunity Workshops, Minority Business Enterprise Seminars, Trade Fairs, etc.

15. Directly or indirectly counsel SB, VOSB, SDVOSB, HUBZone, SDB and WOSB concerns on subcontracting opportunities and how to prepare bids to the company.

16. Conduct or arrange training for purchasing personnel regarding the intent and impact of Section 8(d) of the Small Business Act on purchasing procedures.

17. Develop and maintain an incentive program for buyers that support the subcontracting program.

18. Monitor the company’s performance and make any adjustments necessary to achieve the subcontract plan goals.

19. Prepare and submit timely reports.

20. Coordinate the company’s activities during compliance reviews by Federal agencies.

V. EQUITABLE OPPORTUNITY:

LM will make every effort to ensure equitable opportunity to compete for subcontracts. These efforts may include one or more of the following activities:

A. Outreach efforts to obtain sources:

1. Contact minority and small business trade associations;
2. Contact business development organizations;
4. Attend small minority and women-owned procurement conferences and trade shows.

B. Internal efforts to guide and encourage purchasing personnel:

1. Present workshops, seminars and training programs;
2. Establish, maintain and use SB (including ANCs and Indian tribes), VOSB, SDVOSB, HUBZone, SDB (including ANCs and Indian tribes), and WOSB source lists, guides, and other data for soliciting subcontracts;
3. Monitor activities to evaluate compliance with the subcontracting plan; and
4. Provide guidance on using System For Award Management (SAM) search to identify SB (including ANCs and Indian tribes), VOSB, SDVOSB, HUBZone, SDB (including ANCs and Indian tribes), and WOSB concerns.

C. Other Additional efforts:

VI. ASSURANCES OF CLAUSE INCLUSION AND FLOW DOWN:

Lockheed Martin agrees to include the FAR Clause 52.219-8, “Utilization of Small Business Concerns” in all subcontracts that offer further subcontracting opportunities, and will require all subcontractors (except small business concerns) that receive subcontracts in excess of $650,000 ($1,500,000 for construction) to adopt a plan that complies with the requirements of the clause at 52.219-9, Small Business Subcontracting Plan.

VII. REPORTING AND COOPERATION:

LM agrees to:

(i) Cooperate in any studies or surveys as may be required;
(ii) Submit periodic reports so that the Government can determine the extent of compliance by the offeror with the subcontracting plan;
(iii) Submit the Individual Subcontract Report (ISR), and the Summary Subcontract Report (SSR) using the Electronic Subcontracting Reporting System (eSRS) (http://www.esrs.gov), following the instructions in the eSRS;
(iv) Ensure that its subcontractors with subcontracting plans agree to submit the ISR and/or the SSR using the eSRS;
(v) Provide its prime contract number and its DUNS number and the e-mail address of the Government or Contractor official responsible for acknowledging or rejecting the reports, to all first-tier subcontractors with subcontracting plans so they can enter this information into the eSRS when submitting their reports; and
(vi) Require that each subcontractor with a subcontracting plan provide the prime contract number and its own DUNS number, and the e-mail address of the Government or Contractor official responsible for acknowledging or rejecting the reports, to its subcontractors with subcontracting plans.

Reports are to be submitted within 30 days after the close of each calendar period as indicated in the following chart:

Submit Reports to eSRS
THE eSRS WEB-BASED REPORTING REQUIREMENTS AND POINT OF CONTACT INFORMATION CAN BE FOUND IN THE ATTACHMENT

VIII. RECORDKEEPING:

Lockheed Martin will maintain records concerning procedures that have been adopted to comply with the requirements and goals in the plan, including establishing source lists; and a description of efforts to locate SB (including ANCs and Indian tribes), VOSB, SDVOSB, HUBZone, SDB (including ANCs and Indian tribes), and WOSB concerns and award subcontracts to them. The records shall include at least the following (on a plant-wide or company-wide basis, unless otherwise indicated):

1. Source lists (e.g., CCR), guides, and other data that identify SB (including ANCs and Indian tribes), VOSB, SDVOSB, HUBZone, SDB (including ANCs and Indian tribes), and WOSB concerns.

2. Organizations contacted in an attempt to locate sources that are SB (including ANCs and Indian tribes), VOSB, SDVOSB, HUBZone, SDB (including ANCs and Indian tribes), and WOSB concerns.

3. Records on each subcontract solicitation resulting in an award of more than $150,000, indicating:
   (A) Whether small business concerns were solicited and, if not, why not;
   (B) Whether veteran-owned small business concerns were solicited and, if not, why not;
   (C) Whether service-disabled veteran-owned small business concerns were solicited and, if not, why not;
   (D) Whether HUBZone small business concerns were solicited and, if not, why not;
   (E) Whether small disadvantaged business concerns were solicited and, if not, why not;
   (F) Whether women-owned small business concerns were solicited and, if not, why not; and
   (G) If applicable, the reason award was not made to a small business concern.

4. Records of any outreach efforts to contact
   (A) Trade associations;
   (B) Business development organizations;
   (C) Conferences and trade fairs to locate small, HUBZone small, small disadvantaged, and women-owned small business sources; and
   (D) Veterans service organizations.

5. Records of internal guidance and encouragement provided to buyers through
   (A) Workshops, seminars, training, etc.; and
   (B) Monitoring performance to evaluate compliance with the program’s requirements.
6. On a contract-by-contract basis, records to support award data submitted by the offeror to the Government, including the name, address, and business size of each subcontractor. **Contractors having commercial plans need not comply with this requirement.**

7. Other records to support your compliance with the subcontracting plan:

_____________________________________________________________________________________
_____________________________________________________________________________________
_____________________________________________________________________________________
_____________________________________________________________________________________ 

IX. **STATUTORY REQUIREMENTS**

- Any contractor receiving a contract for more than the simplified acquisition threshold must agree in the contract that SB (including ANCs and Indian tribes), VOSB, SDVOSB, HUBZone, SDB (including ANCs and Indian tribes), and WOSB concerns will have the **maximum practicable opportunity** to participate in contract performance consistent with its efficient performance.
- It is further the policy of the United States that its prime contractors establish procedures to ensure the **timely payment** of amounts due pursuant to the terms of their subcontracts with SB (including ANCs and Indian tribes), VOSB, SDVOSB, HUBZone, SDB (including ANCs and Indian tribes), and WOSB concerns.
- See 19.702(a)(1) for requirements that are imposed in negotiated acquisitions, and (a)(2) for requirements that are imposed in sealed bidding acquisitions.
- As stated in 15 U.S.C. 637(d)(8), any contractor or subcontractor failing to comply in good faith with the requirements of the subcontracting plan is in **material breach of its contract**. Further, 15 U.S.C. 637(d)(4)(F) directs that a contractor’s **failure to make a good faith effort** to comply with the requirements of the subcontracting plan shall result in the imposition of **liquidated damages** (see 19.702(c) and 19.705-7). 

X. **TIMELY PAYMENTS TO SUBCONTRACTORS:**

It is LM’s policy to ensure the timely payments of amounts pursuant and consistent with the negotiated terms and conditions of all subcontracts including those with Small Business Concerns. We have incorporated several payment vehicle enhancements that work in concert with our Procurement and Accounts Payable systems to facilitate the approval / payment process of our invoices. These enhancements include; the ability for our Small Business Suppliers to input claims directly into our Vendor Invoice Process/AP system, and the electronic routing of invoice claims to expedite approvals and subsequent processing to our Accounts payable. LM prides itself on the relationship it maintains with our Small Business supplier base, and as the largest contractor to the federal government we rely on all our subcontractors to perform a significant portion of the work on all of our contracts. Without having a history of making timely payments to subcontractors, many of these subcontractors would not continue their working relationships with Lockheed Martin if we were not making timely payments.

XI. **DESCRIPTION OF GOOD FAITH EFFORT** *(Also refer to 13 CFR 125.3(d), Determination of Good Faith Effort)*

*In order to demonstrate your compliance with a good faith effort to achieve the small business subcontracting goals, outline the steps below that your company plans to take.*

LM will take the following steps to demonstrate compliance with a good faith effort in achieving small business subcontracting goals:
Description of good faith effort:

Lockheed Martin Corporation supplier diversity professionals will work with buyers, strategic sourcing teams, and technical organizations to ensure that SB concerns are afforded the maximum practicable opportunity to participate in the Corporation’s subcontracting process. In an effort to identify capable firms, Lockheed Martin will participate as sponsors, exhibitors, counselors, and/or guest speakers at the following events; 1) U.S. Small Business Administration Small Business Week Conference and Trade Fair, 2) District Small Business Administration Matchmaking Events and Trade Fairs, 3) National Minority Supplier Development Council Annual Conference and Trade Fair, 4) Lockheed Martin Corporation Supplier Information Sessions, 5) National American Indian Center’s Reservation & Economic Summit, 6) U.S. Department of Commerce – Minority Business Development Agency, 7) Regional and National Minority Enterprise Development (MED) Week Conferences and Trade Fairs, 8) Government and Industry Sponsored Trade Fairs around the country.

A concerted effort will be made by all Lockheed Martin Corporation operating companies to identify and facilitate procurement opportunities, solicit, and fairly evaluate all small business concerns. Detailed requirements are outlined in the Lockheed Martin Acquisition Procedure (LMAP). To this end, Lockheed Martin Corporation will;

1) Ensure that bidding period, delivery schedules, and all other elements of solicitations do not include provisions that unfairly restrict or eliminate inclusion of small business concerns, 2) Where practical, consider breaking up order requirements to include small business concerns & HBCU/MI/TCU participation, 3) Ensure that make-buy deliberations consider the potential impact on small business subcontracting, 4) Work with engineering and program personnel to evaluate small business concerns during the design and development phase, 5) Ensure that specifications, drawings, and other relevant data are made available to small business concerns in a timely manner, 6) Use restricted competitions, where appropriate and practical, 7) Provide counseling and other forms of assistance to small business concerns to the extent that it does not compromise the integrity of the Corporation’s procurement process, 8) Authorize progress payments and performance-based payment to small business concerns in instances where considerable investment is required to perform under a Lockheed Martin Corporation subcontract or purchase order, 9) Provide small business concerns with the use of Lockheed Martin Corporation owned tooling and equipment, where practical, and 10) Host trade fairs and conferences whereby potential suppliers can meet key members of the Lockheed Martin Corporation engineering, program management, manufacturing, and procurement staff.

The above requirements will be negotiated with the contracting officer prior to approval. The contracting officer must ensure per FAR 19.705-5(a)(5) that an acceptable plan is incorporated into and made a material part of the contract.

SIGNATURE REQUIRED:

This subcontracting plan was SUBMITTED by:
REPORTING INSTRUCTIONS FOR CONTRACTORS

Electronic Subcontracting Reporting System web-based reporting requirements found at FAR clause 52.219-9(l):

The Contractor shall submit ISRs and SSRs using the web-based eSRS at http://www.esrs.gov. Purchases from a corporation, company, or subdivision that is an affiliate of the prime Contractor or subcontractor are not included in these reports. Subcontract award data reported by prime Contractors and subcontractors shall be limited to awards made to their immediate next-tier subcontractors. Credit cannot be taken for awards made to lower tier subcontractors, unless the Contractor or subcontractor has been designated to receive a small business or small disadvantaged business credit from an ANC or Indian tribe.

(1) ISR. This report is not required for commercial plans. The report is required for each contract containing an individual subcontract plan and shall be submitted to the Administrative Contracting Officer (ACO) or Contracting Officer, if no ACO is assigned.

(i) The report shall be submitted semi-annually during contract performance for the periods ending March 31 and September 30. A report is also required for each contract within 30 days of contract completion. Reports are due 30 days after the close of each reporting period, unless otherwise directed by the Contracting Officer. Reports are required when due, regardless of whether there has been any subcontracting activity since the inception of the contract or the previous reporting period.

(ii) When a subcontracting plan contains separate goals for the basic contract and each option, as prescribed by FAR 19.704(c), the dollar goal inserted on this report shall be the sum of the base period through the current option; for example, for a report submitted after the second option is exercised, the dollar goal would be the sum of the goals for the basic contract, the first option, and the second option.

(iii) The authority to acknowledge receipt or reject the ISR resides—
   (A) In the case of the prime Contractor, with the Contracting Officer; and
   (B) In the case of a subcontract with a subcontracting plan, with the entity that awarded the subcontract.
(2) SSR.

(i) Reports submitted under individual contract plans—

(A) This report encompasses all subcontracting under prime contracts and subcontracts with the awarding agency, regardless of the dollar value of the subcontracts.

(B) The report may be submitted on a corporate, company or subdivision (e.g. plant or division operating as a separate profit center) basis, unless otherwise directed by the agency.

(C) If a prime Contractor and/or subcontractor is performing work for more than one executive agency, a separate report shall be submitted to each executive agency covering only that agency’s contracts, provided at least one of that agency’s contracts is over $650,000 (over $1,500,000 for construction of a public facility) and contains a subcontracting plan. For DoD, a consolidated report shall be submitted for all contracts awarded by military departments/agencies and/or subcontracts awarded by DoD prime Contractors. However, for construction and related maintenance and repair, a separate report shall be submitted for each DoD component.

(D) For DoD and NASA, the report shall be submitted semi-annually for the six months ending March 31 and the twelve months ending September 30. For civilian agencies, except NASA, it shall be submitted annually for the twelve month period ending September 30. Reports are due 30 days after the close of each reporting period.

(E) Subcontract awards that are related to work for more than one executive agency shall be appropriately allocated.

(F) The authority to acknowledge or reject SSRs in eSRS, including SSRs submitted by subcontractors with subcontracting plans, resides with the Government agency awarding the prime contracts.

(ii) Reports submitted under a commercial plan—

(A) The report shall include all subcontract awards under the commercial plan in effect during the Government’s fiscal year.

(B) The report shall be submitted annually, within thirty days after the end of the Government’s fiscal year.

(C) If a Contractor has a commercial plan and is performing work for more than one executive agency, the Contractor shall specify the percentage of dollars attributable to each agency from which contracts for commercial items were received.

(D) The authority to acknowledge or reject SSRs for commercial plans resides with the Contracting Officer who approved the commercial plan.

(iii) All reports submitted at the close of each fiscal year (both individual and commercial plans) shall include a Year-End Supplementary Report for Small Disadvantaged Businesses. The report shall include subcontract awards, in whole dollars, to small disadvantaged business concerns by North American Industry Classification System (NAICS) Industry Subsector. If the data are not available when the year-end SSR is submitted, the prime Contractor and/or subcontractor shall submit the Year-End Supplementary Report for Small Disadvantaged Businesses within 90 days of submitting the year-end SSR. For a commercial plan, the Contractor may obtain from each of its subcontractors a predominant NAICS Industry Subsector and report all awards to that subcontractor under its predominant NAICS Industry Subsector.
